

Extensibility for SAP S/4HANA

Cursusduur: 3 Dagen Cursuscode: S4D425 Trainingsmethode: Virtual Learning

Beschrijving:

This course covers the different extensibility approaches for SAP S/4HANA that are available to customers and partners: In-app extensibility focuses on adaptations created by key users that have a deep business knowledge but no technical expertise. In-app extensibility comprises adding new fields or custom logic and adapting the standard UIs. Creating custom UIs, and custom business objects is also supported as part of Key-User extensibility. In contrast to in-app extensibility, side-by-side extensibility on SAP Business Technology Platform allows developers to build their own applications, enhancing and supplementing SAP S/4HANA and SAP S/4HANA Cloud.

Virtual Learning

This interactive training can be taken from any location, your office or home and is delivered by a trainer. This training does not have any delegates in the class with the instructor, since all delegates are virtually connected. Virtual delegates do not travel to this course, Global Knowledge will send you all the information needed before the start of the course and you can test the logins.

Doelgroep:

- Application Consultant
- Developer
- Development Consultant
- Solution Architect
- System Administrator
- System Architect
- Technology Consultant
- User

Doelstelling:

- This course will prepare you to:
 - personalize SAP Fiori applications with end user tools
- explain the extensibility concept for SAP S/4HANA
 - use the extension options for key users
- extend the SAP Fiori launchpad
 - explain the concept of side-by-side extensibility using SAP Business Technology Platform

Vereiste kennis en vaardigheden:

Essential

- S4DEV (Hands-on Introduction to Application Programming on SAP S/4HANA)

Recommended

- none

Cursusinhoud:

SAP S/4HANA Extensibility Overview

- Get to know about the extensibility concept in SAP S/4HANA

SAP Fiori Launchpad Adaption

- Personalize the SAP Fiori launchpad
- Manage the SAP Fiori launchpad content
- Extend the SAP Fiori launchpad

Key User Extensibility

- Use variant management
- Use SAP Fiori runtime authoring
- Create data source extensions
- Create custom fields
- Enable custom database fields for usage in SAP Fiori applications
- Create custom logic
- Create custom business objects
- Create a UI for a custom business object
- Add custom logic to a custom business object
- Create custom libraries and methods
- Create custom code lists
- Transport extension items

Side-by-Side Extensibility

- Describe essential features of side-by-side extensions
- Name the most important factors that influence the choice of the extensibility option
- Develop an extension for SAP S/4HANA with SAP BTP ABAP Environment

Extra informatie:

Course based on software release SAP S/4HANA 2023 ABAP Platform 2023 AS ABAP 7.58 SAP Business Application Studio SAP BTP ABAP Environment
