# Implementing Cisco Service Provider Advanced Routing Solutions

Cursusduur: 5 Dagen Cursuscode: SPRI Version: 1.1 Trainingsmethode: Maatwerk

#### Beschrijving:

The Implementing Cisco Service Provider Advanced Routing Solutions (SPRI) course expands a students knowledge and skills in service provider core networking. You will cover the theories and practical knowledge of advanced routing technologies including routing protocols, policy language, Multiprotocol Label Switching (MPLS), and segment routing.

#### This course is worth 40 Continuing Education (CE) Credits.

#### Company Events

These events can be delivered exclusively for your company at our locations or yours, specifically for your delegates and your needs. The Company Events can be tailored or standard course deliveries.

#### Doelgroep:

Engineers who maintain and operate advanced Service Provider core networks.

#### **Doelstelling:**

- After completing this course you should be able to:
- Implement advanced features of multiarea Open Shortest Path First (OSPFv2) running in Service Provider networks
- Implement advanced features of multilevel Intermediate System to Intermediate System (ISIS) running in Service Provider networks
- Describe the main characteristics of routing protocols that are used in service provider environments
- Configure route redistribution
- Configure Border Gateway Protocol (BGP) in order to successfully connect the Service Provider network to the customer or upstream Service Provider
- Configure BGP scalability in Service Provider networks
- Implement BGP security options
- Implement advanced features in order to improve convergence in BGP networks
- Troubleshoot OSPF, ISIS, and BGP

- Implement and verify MPLS
- Implement and troubleshoot MPLS Traffic engineering
- Implement and verify segment routing technology within an interior gateway protocol
- Describe how traffic engineering is used in segment routing networks
- Implement IPv6 tunneling mechanisms
- Describe and compare core multicast concepts
- Implement and verify the PIM-SM protocol
- Implement enhanced Protocol-Independent Multicast Sparse Mode (PIM-SM) features
- Implement Multicast Source Discovery Protocol (MSDP) in the interdomain environment
- Implement mechanisms for dynamic Rendezvous Point (RP) distribution

#### Vereiste kennis en vaardigheden:

#### Attendees should meet the following prerequisites:

Intermediate to advanced knowledge of Cisco Internetwork Operating System (Cisco IOS®) or IOS XE and Cisco IOS XR Software configuration

## Examens en certificering

#### Recommended as preparation for the following exams:

- 300-510 Implmenting Cisco Service Provider Advanced Routing Solutions (SPRI) exam
- Passing the 300-510 SPRI exam earns you the Cisco Certified

Cursusinhoud:		
mplementing and Verifying Open Shortest Path First Multiarea Networks	Improving BGP Convergence and Implementing Advanced Operations	Implementing IP Multicast Concepts and Technologies
Implementing and Verifying Intermediate System to Intermediate System Multilevel Networks	Troubleshooting Routing Protocols	Implementing PIM-SM Protocol
	Implementing and Verifying MPLS	Implementing PIM-SM Enhancements
ntroducing Routing Protocol Tools, Route Maps, and Routing Policy Language	Implementing Cisco MPLS Traffic Engineering	Implementing Interdomain IP Multicast
mplementing Route Redistribution	Implementing Segment Routing	Implementing Distributed Rendezvous Poir Solution in Multicast Network
nfluencing Border Gateway Protocol Route Selection	Describing Segment Routing Traffic Engineering (SR TE)	Labs
Scaling BGP in Service Provider Networks	Deploying IDus Tunneling Machaniama	<ul> <li>Implement OSPF Special Area Types (IPv4 and IPv6)</li> <li>Implement Multicrea IS IS</li> </ul>
Securing BGP in Service Provider Networks	Deploying IPv6 Tunneling Mechanisms	<ul> <li>Implement Multiarea IS-IS</li> <li>Implement Route Redistribution</li> <li>Influence BGP Route Selection</li> <li>Implement BGP Route Reflectors</li> </ul>
		<ul> <li>Implement BGP Security Options</li> <li>Troubleshoot Routing Protocols</li> </ul>
		Implement MPLS in the Service Provider Core
		<ul> <li>Implement Cisco MPLS TE</li> <li>Configure and Verify Interior Gateway</li> </ul>
		Protocol (IGP) Segment Routing
		Implement Tunnels for IPv6
		<ul> <li>Enable and Optimize PIM-SM</li> <li>Implement PIM-SM Enhancements</li> </ul>

lepenhoeve 5, 3438 MR Nieuwegein

Knowledge of IPv4 and IPv6 TCP/IP networking

Understanding of MPLS technologies
 Understanding of multicast technologies
 Familiarity with segment routing

Network Core Technologies

protocols

Foundations

Intermediate knowledge of BGP, OSPF, and ISIS routing

SPCOR - Implementing and Operating Cisco Service Provider

SPFNDU - Understanding Cisco Service Provider Network

Specialist - Service Provider Advanced Routing Implementation certification, and satisfies the concentration exam requirement for the <u>CCNP Service Provider</u> certification.

Implement Rendezvous Point Distribution
