

IBM Db2 LUW Family Fundamentals

Cursusduur: 2 Dagen Cursuscode: CE032G Trainingsmethode: Virtual Learning

Beschrijving:

This course provides you with information about the functions of IBM's Db2, a relational database manager which may be installed under a variety of operating systems on many hardware platforms. Db2 runs under a number of operating systems, such as z/OS, VM, Linux, UNIX, and Windows operating systems. The course includes discussion of how the Db2 products provide services. The focus is on the services Db2 provides and how users work with Db2, not on its internal workings. This course does not include hands-on labs.

Virtueel en Klassikaal™

Virtueel en Klassikaal™ is een eenvoudig leerconcept en biedt een flexibele oplossing voor het volgen van een klassikale training. Met Virtueel en Klassikaal™ kunt u zelf beslissen of u een klassikale training virtueel (vanuit huis of kantoor) of fysiek op locatie wilt volgen. De keuze is aan u! Cursisten die virtueel deelnemen aan de training ontvangen voor aanvang van de training alle benodigde informatie om de training te kunnen volgen.

Doelgroep:

Persons needing an introductory knowledge of DB2, and persons who are preparing for advanced and specialized DB2 education.

Doelstelling:

- | | |
|--|--|
| ■ After completing this course, you should be able to: | ■ List and describe several ways to build (write) and execute SQL statements |
| ■ List and describe the major components of IBM's relational database, Db2 | ■ List and describe the steps needed to embed SQL statements in an application program |
| ■ Explain the characteristics of a Db2 table | ■ Explain some of the functions performed by system and database administrators |
| ■ Describe the basic concepts of data modeling | ■ Establish a base for more specialized Db2 education |
| ■ Understand and code the processing instructions given to Db2 via simple SQL statements | |

Vereiste kennis en vaardigheden:

Basic knowledge in data processing.

Cursusinhoud:

The following topics are included in this course:

- Understanding a table
- Data modeling and database design
- How end users use Db2
- How a programmer uses Db2
- What a system administrator does in Db2
- What a database administrator does in Db2
- Information management with Db2
