

IBM i System Administration

Cursusduur: 5 Dagen Cursuscode: OL19G Trainingsmethode: Virtual Learning

Beschrijving:

Learn how to plan for, implement, and manage the ongoing operations of an IBM i. Emphasis is on security, system availability, backup and recovery, system software management, and problem determination. Also, get an introduction to the architecture and terminology of the IBM i. This course provides lectures and hands on labs.

Virtueel en Klassikaal™

Virtueel en Klassikaal™ is een eenvoudig leerconcept en biedt een flexibele oplossing voor het volgen van een klassikale training. Met Virtueel en Klassikaal™ kunt u zelf beslissen of u een klassikale training virtueel (vanuit huis of kantoor) of fysiek op locatie wilt volgen. De keuze is aan u! Cursisten die virtueel deelnemen aan de training ontvangen voor aanvang van de training alle benodigde informatie om de training te kunnen volgen.

Doelgroep:

This is an intermediate course intended for IBM i system administrators, data processing managers and other individuals who implement and manage security, backup and recovery, system software and problem determination. This course is not recommended for system operators (See AS24G).

Doelstelling:

- | | |
|--|--|
| ■ After this course participants should be able to: | ■ Describe the IBM i availability products and features and choose the option(s) that best fit your company requirements |
| ■ Describe and implement the components of IBM i security, such as user profile, group profile, authorization list, adopted authority and object / resource security | ■ Describe how to backup and recover user, IBM and full system data on your Power Systems with IBM i |
| ■ Develop a security plan for your Power Systems with IBM i | ■ Develop a backup and recovery plan for your Power Systems with IBM i |
| ■ Describe the options to implement security auditing | ■ Describe the system diagnostics and problem determination procedures available on your Power Systems with IBM i |
| ■ Develop a plan to audit security on your Power Systems with IBM i | |

Vereiste kennis en vaardigheden:

You should:

- complete System Operator Workshop for IBM i (AS24G) or have equivalent knowledge
- have responsibility for implementing the security features available for IBM i
- have responsibility for the implementation of a backup and recovery plan and system availability for your Power Systems with IBM i

Vervolg cursussen:

- OL23G IBM i Performance Tuning - I: IBM i Structure, Tailoring and Basic Tuning
- OL66G IBM i Performance Tuning - II: Advanced Analysis and Capacity Tuning

Cursusinhoud:

- | | | |
|---|--|---|
| <ul style="list-style-type: none">■ Class administration and introductions■ IBM i overview and concepts■ Management central overview■ Security concepts and overview■ System values■ User security | <ul style="list-style-type: none">■ Resource security■ Security auditing■ Designing security■ IBM i availability overview■ Disk management■ Backup and recovery strategy using Save/Restore | <ul style="list-style-type: none">■ Journal management■ Commitment control overview■ Backup and recovery planning■ Problem determination■ Overview of Systems Director Navigator for i■ Introduction to BRMS |
