

IBM i System Administration

Cursusduur: 5 Dagen Cursuscode: OL19G Trainingsmethode: Virtual Learning

Beschrijving:

Learn how to plan for, implement, and manage the ongoing operations of an IBM i. Emphasis is on security, system availability, backup and recovery, system software management, and problem determination. Also, get an introduction to the architecture and terminology of the IBM i. This course provides lectures and hands on labs.

Doelgroep:

This is an intermediate course intended for IBM i system administrators, data processing managers and other individuals who implement and manage security, backup and recovery, system software and problem determination. This course is not recommended for system operators (See AS24G).

Doelstelling:

- After this course participants should be able to:
- Describe and implement the components of IBM i security, such as user profile, group profile, authorization list, adopted authority and object / resource security
- Develop a security plan for your Power Systems with IBM i
- Describe the options to implement security auditing
- Develop a plan to audit security on your Power Systems with IBM i
- Describe the IBM i availability products and features and choose the option(s) that best fit your company requirements
- Describe how to backup and recover user, IBM and full system data on your Power Systems with IBM i
- Develop a backup and recovery plan for your Power Systems with IBM i
- Describe the system diagnostics and problem determination procedures available on your Power Systems with IBM i

Vereiste kennis en vaardigheden:

You should:

- complete System Operator Workshop for IBM i (AS24G) or have equivalent knowledge
- have responsibility for implementing the security features available for IBM i
- have responsibility for the implementation of a backup and recovery plan and system availability for your Power Systems with IBM i

Vervolg cursussen:

- OL23G IBM i Performance Tuning - I: IBM i Structure, Tailoring and Basic Tuning
- OL66G IBM i Performance Tuning - II: Advanced Analysis and Capacity Tuning
