

IBM zSecure Audit Rule-based Compliance Evaluation and Customization

Cursusduur: 2 Dagen Cursuscode: TK274G Trainingsmethode: Virtual Learning

Beschrijving:

This course introduces the zSecure Audit rule-based compliance evaluation framework. The course explains rule-based compliance evaluation concepts and includes an overview and demonstration of the supported compliance evaluation functions and reports. With the standard built-in compliance evaluation interface, you report the compliance of your systems against one or more of the supported external standards: STIG, STIGplus, GSD, or PCI-DSS. The course also teaches you how to customize compliance evaluations for the supported standards to fit your company's requirements. Finally, you learn how to create a company-defined compliance standard. Hands-on exercises are included to enforce the skills that are taught in this course so that you can experiment with the rule-based compliance evaluation interface.

Virtueel en Klassikaal™

Virtueel en Klassikaal™ is een eenvoudig leerconcept en biedt een flexibele oplossing voor het volgen van een klassikale training. Met Virtueel en Klassikaal™ kunt u zelf beslissen of u een klassikale training virtueel (vanuit huis of kantoor) of fysiek op locatie wilt volgen. De keuze is aan u! Cursisten die virtueel deelnemen aan de training ontvangen voor aanvang van de training alle benodigde informatie om de training te kunnen volgen.

Doelgroep:

The target audience for this advanced-level course is security administrators, auditors, and compliance officers.

Doelstelling:

- After this course participants should be able to:
- Explain the concept of rule-based compliance evaluation with zSecure Audit
- Run compliance evaluations against the supported standards GSD331, STIG, and PCI-DSS
- Use the compliance evaluation results to apply the applicable changes to comply with the applicable (external) standard
- Customize compliance evaluations to fit with company security and audit policies
- Build customized system-defined compliance standards, rule sets, rules, and tests

Vereiste kennis en vaardigheden:

Before taking this course, make sure that you have the following skills:

- Basic knowledge of and experience with z/OS and RACF as provided by courses ES10G, ES07G and ES19G
- Familiarity with the IBM Security zSecure Audit ISPF panel interface
- Knowledge of and experience with the CARLa programming language as provided by course TK234G

Cursusinhoud:

Unit 1: Rule-based compliance introduction and concepts

Unit 2: Running compliance evaluations and interpret results

Unit 3: Customizing compliance standards, rules, or tests
