

Developing Decision Services in IBM Operational Decision Manager?

Cursusduur: 2 Dagen Cursuscode: WB406G Trainingsmethode: Virtual Learning

Beschrijving:

This course teaches developers how to design and develop decision services with IBM Operational Decision Manager 8.11.1. The course begins with an overview of Operational Decision Manager, which is composed of two main environments: Decision Server for technical users and Decision Center for business users. The course outlines the collaboration between development and business teams during project development. Through hands-on exercises, you learn how to design decision services and implement object models in Rule Designer. You learn how to support business users by setting up the rule authoring environment. And you enable rule testing and simulation so business users can ensure that their rulesets produce the correct outcome. The lab environment for this course uses Windows Server 2019 Standard.

Virtueel en Klassikaal™

Virtueel en Klassikaal™ is een eenvoudig leerconcept en biedt een flexibele oplossing voor het volgen van een klassikale training. Met Virtueel en Klassikaal™ kunt u zelf beslissen of u een klassikale training virtueel (vanuit huis of kantoor) of fysiek op locatie wilt volgen. De keuze is aan u! Cursisten die virtueel deelnemen aan de training ontvangen voor aanvang van de training alle benodigde informatie om de training te kunnen volgen.

Doelgroep:

This course is designed for developers.

Doelstelling:

- | | |
|--|--|
| ■ After completing this course, you should be able to: | ■ Exercise 1. Operational Decision Manager in action |
| ■ Describe the benefits of implementing a decision management solution with Operational Decision Manager | ■ Exercise 2. Setting up decision services |
| ■ Identify the key user roles that are involved in designing and developing a decision management solution, and the tasks that are associated with each role | ■ Exercise 3. Working with ruleflows |
| ■ Describe the development process of building a business rule application and the collaboration between business and development teams | ■ Exercise 4. Working with the BOM |
| ■ Set up the Business Object Model (BOM) and vocabulary for rule authoring | ■ Exercise 5. Refactoring |
| ■ Implement the Execution Object Model (XOM) that enables rule execution | ■ Exercise 6. Exploring action rules |
| ■ Orchestrate rule execution through ruleflows | ■ Exercise 7. Authoring action rules |
| ■ Author rule artifacts to implement business policies | ■ Exercise 8. Authoring decision tables |
| ■ Set up and customize rule validation for business users to ensure | ■ Exercise 9. Enabling rule validation |

Vereiste kennis en vaardigheden:

Before taking this course, you should have:

- Experience with the Java programming language and object-oriented concepts
 - Basic knowledge of Extensible Markup Language (XML)
-
