IBM Cloud Pak for Business Automation - Installation

Cursusduur: 2 Dagen **Cursuscode: WB601G** **Trainingsmethode: Virtual Learning**

Beschrijving:

This course provides technical professionals with the needed skills to install IBM Cloud Pak for Business Automation capabilities.
The course begins with an introduction to IBM Cloud Pak for Business Automation (CP4BA). You learn about different CP4BA installation methods. You configure the custom resource (CR) file for Business Automation Navigator (BAN), deploy, and verify that all the prerequisites are configured correctly.
You learn how to deploy the CP4BA capabilities such as FileNet Content Manager, Business Automation Studio, Business Automation Workflow, Operational Decision Manager, and Business Automation Insights. For each of the CP4BA capabilities, you verify the associated end points.

Virtual Learning

This interactive training can be taken from any location, your office or home and is delivered by a trainer. This training does not have any delegates in the class with the instructor, since all delegates are virtually connected. Virtual delegates do not travel to this course, Global Knowledge will send you all the information needed before the start of the course and you can test the logins.

Doelgroep:

This course is intended for administrators of IBM Cloud Pak for Business Automation (CP4BA) who want to deploy the CP4BA capabilities.
