

IBM Business Automation Workflow 23.0.2: Creating and Managing Case Management Solutions

Cursusduur: 1 Dag Cursuscode: WB880G Trainingsmethode: Virtual Learning

Beschrijving:

In this two-day intermediate-level course, you learn about case solution design using IBM Business Automation Workflow (BAW). You export and import case solutions. You define various case objects such as properties, choice lists, roles, business objects, and case types. You create To-do Tasks and Container activities and implement preconditions and Sets to manage activities. You create custom property views for case pages. You model BPM processes for case activities and create client-side human services. You create case stages and manage the stages manually and automatically with JavaScript. This course also teaches you how to create custom pages and implement Free Form page layout and utility widgets for case solutions.

Virtueel en Klassikaal™
