

IBM App Connect Enterprise Administration I

Cursusduur: 2 Dagen Cursuscode: WM677G Trainingsmethode: Virtual Learning

Beschrijving:

Participants gain in-depth knowledge of IBM App Connect Enterprise architecture, deployment strategies, security implementation, and troubleshooting techniques. Through hands-on labs administrators learn to effectively manage and maintain IBM App Connect Enterprise environments, helping ensure seamless integration across diverse enterprise systems.

Virtueel en Klassikaal™

Virtueel en Klassikaal™ is een eenvoudig leerconcept en biedt een flexibele oplossing voor het volgen van een klassikale training. Met Virtueel en Klassikaal™ kunt u zelf beslissen of u een klassikale training virtueel (vanuit huis of kantoor) of fysiek op locatie wilt volgen. De keuze is aan u! Cursisten die virtueel deelnemen aan de training ontvangen voor aanvang van de training alle benodigde informatie om de training te kunnen volgen.

Doelgroep:

This course is designed for technical professionals who require the skills to administer IBM App Connect Enterprise.

Doelstelling:

- After this course participants should be able to:
- Explain the core concepts and architecture of IBM App Connect Enterprise
- Explain how to manage integration nodes and servers effectively
- Use the Message Flow editor to examine the message flow components and properties
- Implement secure communication protocols and authentication mechanisms
- Deploy integration resources effectively by using command-line tools
- Configure and administer IBM App Connect Enterprise by using command-line interfaces
- Deploy IBM App Connect Enterprise message flow applications by using the IBM App Connect Enterprise commands and the IBM App Connect Enterprise web user interface
- Manage runtime components, including integration nodes and servers
- Configure administration security to control access to resources
- Secure the IBM App Connect Enterprise Toolkit and web user interface with user ID and password
- Configure IBM App Connect Enterprise to require a user ID and password to accomplish administration-related tasks
- Implement backup and recovery procedures for IBM App Connect Enterprise configurations and data
- Configure and manage message flows and integration services
- Backup and restore an integration node and its configuration
- Use IBM App Connect Enterprise web user interface for administration tasks
- Use the administrative REST API to interact with a stand-alone integration server

Cursusinhoud:

Exercises

- Exercise 1. Importing and testing a message flow
- Exercise 2. Using the command line to deploy resources
- Exercise 3. Using the IBM App Connect Enterprise Toolkit
- Exercise 4. Administering runtime environments
- Exercise 5. Configuring administration security
- Exercise 6. Configuring the authorization of resources
- Exercise 7. Exploring the Admin REST API
