Veeam Backup & Replication: Configure, Manage and Recover (VBRCMR)

Cursusduur: 4 Dagen   Cursuscode: VMCE   Version: 12.1   Trainingsmethode: Virtual Learning

Beschrijving:

The Veeam® Backup & Replication™ v12.1: Configure, Manage and Recover training course is a four-day technical course focused on teaching IT professionals the skills to configure, manage and support a Veeam Backup & Replication v12.1 solution. With extensive hands-on labs, the class promotes situational resiliency in responding to recovery scenarios and enables administrators and engineers to effectively protect and manage data in an ever-changing technical and business environment, bringing tangible benefit to business in the digital world. This course is based on Veeam Backup & Replication v12.1, part of Veeam Data Platform.

Virtueel en Klassikaal™

Virtueel en Klassikaal™ is een eenvoudig leerconcept en biedt een flexibele oplossing voor het volgen van een klassikale training. Met Virtueel en Klassikaal™ kunt u zelf beslissen of u een klassikale training virtueel (vanuit huis of kantoor)of fysiek op locatie wilt volgen. De keuze is aan u! Cursisten die virtueel deelnemen aan de training ontvangen voor aanvang van de training alle benodigde informatie om de training te kunnen volgen.

Doelgroep:

This course is suitable for anyone responsible for configuring, managing or supporting a Veeam Backup & Replication v12.1 environment.

Doelstelling:

- **After completing this course, attendees will be able to:**

- Describe Veeam security concepts

- Given a scenario, configure a backup job and a backup copy job

- Explain network-attached storage (NAS) backups and configuration

- Describe Veeam's replication capabilities

- Determine appropriate use case for backups, replicas and/or continuous data protection

- Configure backup infrastructure components, including proxy and repository servers

- Given a scenario, evaluate when and how to apply immutability settings

- Given a scenario, recover data from backups

Vereiste kennis en vaardigheden:

- Students should have fundamental IT experience working with networking, servers, storage, cloud, virtualization and operating systems.
- To get the most out of this course, students should be familiar with the core fundamental concepts of Veeam Backup & Replication through hands-on experience

Examens en certificering

- Completion of this course satisfies the prerequisite for taking Veeam Certified Engineer (VMCE™) v12 exam.

Vervolgcursussen:

- VMCA - Veeam Backup & Replication: Architecture and Design

Cursusinhoud:

Data protection strategies

Review of key data protection strategies that ensure the safety of your data.

Risk scenarios

Explore different risk scenarios, what risks do we face daily within our environment?

Core components

Review of Veeam Backup ; Replication components required in most deployments, their purpose and key system requirements.?

Initial security considerations

Describe strategies and tools to secure the Veeam backup server to avoid unauthorized access and data leaks.

Virtual machine backup

Efficiently protect VMware and Hyper-V virtual machines based on well-defined SLAs through the creation of backup jobs.

Agent backup

Identify the use of protection groups to automate the installation of Veeam Agents and protecting workloads with agent backup jobs.

Unstructured data backup

List required components and features available to protect unstructured data.

Backup data optimizations?

Analyze features and settings that allow backup storage optimization, faster backups and data consistency

Immutability and hardened repositories

Describe backup data protection mechanisms to avoid premature deletion and unwanted modifications. Identify characteristics and deployment steps of Linux Hardened Repositories to achieve backup data immutability.?

Object storage?

Review why backing up to object storage, which object storage solutions are supported and considerations when using this type of repositories.?

Transport modes?

Analyze different ways data can be read from the production environment and their benefits and considerations.?

Backup copies

Ensure recoverability and adhere to the 3-2-1 Rule with backup copy jobs.

Scale-out Backup Repository™

Describe architecture, placement policies, data tiers and management of Scale-out Backup Repositories.

Moving or copying backups

Identify use cases for workload and backup migrations with VeeaMover.?

Replication

Describe use cases, architectures and features of replication jobs and continuous data protection (CDP) policies.?

Verifying recoverability

Create automated tests to ensure recoverability from backups and replicas.

Veeam Backup Enterprise Manager?

Describe the use cases for Veeam Backup Enterprise Manager.?

Incident Response Planning?

Integrating Veeam Backup and Replication into your incident response plan.?

Recovery scenarios and features?

What are the implications of different recovery methods and selecting the correct recovery method.

Enacting a recovery?

Get practice in recovering different recovery types with a variety of data types.?

Veeam Data Platform

Identify and explain the purpose of each core product within the Veeam Data Platform and articulate potential use cases for them.?
