

## Managing Decisions in IBM Operational Decision Manager V8.9

Duration: 5 Days    Course Code: WB401G    Delivery Method: Virtual Learning

### Overview:

This course introduces business analysts to IBM Operational Decision Manager V8.9. You learn the concepts and skills that are necessary to capture, author, validate, and manage business rules with Operational Decision Manager.

IBM Operational Decision Manager provides a complete platform for managing business rules by helping to automate and govern decisions across processes and applications. This course focuses on the iterative nature of working collaboratively with business policy experts and development teams on rule projects. Through instructor-led presentations and hands-on lab exercises, you learn about the core features of Operational Decision Manager. You also receive intensive training in modeling business rule vocabulary, rule discovery, rule authoring, and rule governance and management. The course uses realistic scenarios and a case study to illustrate the principles and good practices for discovering, analyzing, and authoring business rules.

### Virtueel en Klassikaal™

Virtueel en Klassikaal™ is een eenvoudig leerconcept en biedt een flexibele oplossing voor het volgen van een klassikale training. Met Virtueel en Klassikaal™ kunt u zelf beslissen of u een klassikale training virtueel (vanuit huis of kantoor) of fysiek op locatie wilt volgen. De keuze is aan u! Cursisten die virtueel deelnemen aan de training ontvangen voor aanvang van de training alle benodigde informatie om de training te kunnen volgen.

### Target Audience:

This course is designed for business analysts.

### Objectives:

- Describe the benefits of implementing an Operational Decision Manager solution
- Identify the main user roles and tasks that are involved in designing and developing an Operational Decision Manager solution
- Explain modeling concepts and the UML notation that is relevant to modeling for business rules
- Define and implement object models for business rules
- Set up the rule authoring environment in Designer by working with decision services and synchronizing across development and business environments
- Transform business policy into rule statements and make sure that they form a complete and coherent set of rules
- Use the Operational Decision Manager rule editors to author business rules and decision tables
- Run tests and simulations in the Decision Center Business console to validate decision logic and rule changes
- Work with Decision Center decision service administration tools
- Manage user access and permissions in the Business console
- Use Operational Decision Manager tools to support decision governance

### Prerequisites:

- Experience with identifying and defining business policies and rules
- A basic understanding of business models

## Content:

Course introduction	Introducing rule authoring	Exercise: Authoring decision tables
Introducing IBM Operational Decision Manager V8.9	Exercise: Understanding the case study	Exercise: Authoring rules: Putting it all together
Exercise: Operational Decision Manager in action	Discovering and analyzing rules	Running tests and simulations
Modeling for business rules	Exercise: Discovering rules	Exercise: Running tests and simulations in the Business console
Exercise: Building the model on paper	Exercise: Analyzing rules	Working with Decision Center administrative tools
Exercise: Implementing the model	Working with conditions in rules	Exercise: Working with management features in Decision Center
Understanding decision services	Exercise: Working with conditions in rules	Exercise: Managing user access in Decision Center
Exercise: Setting up a decision service	Working with definitions in rules	Introducing decision governance
Working with the BOM	Exercise: Working with definitions in rules	Exercise: Working with the decision governance framework
Exercise: Working with the BOM	Writing complete rules	Course summary
Introducing Decision Center	Exercise: Writing complete rules	
Exercise: Exploring the Decision Center Business console	Authoring decision tables	

---
