

Understanding Cisco Contact Center Enterprise Foundations

Varighet: 1 Day Kurskode: CCEF Version: 1.0 Opplæringsmetoder: Virtuell opplæring

Beskrivelse:

The **Understanding Cisco Contact Center Enterprise Foundations (CCEF)** course gives you an overview of the Cisco® Packaged Contact Center Enterprise (PCCE) and Unified Contact Center Enterprise solutions. You will gain an understanding of contact center basics and describe the available Cisco contact center solutions and intended target customers. You will also focus on the Cisco Contact Center Enterprise (CCE) family of products and explore key features and functionality of the solution including architecture, major system components, and tools used for administration and reporting. This course is the foundation for additional courses required to deploy, configure, support, and troubleshoot Cisco CCE solutions.

Virtuell opplæring

V&C Select™ er et veldig enkelt konsept og svært fleksibelt. Du kan delta personlig i klassen eller som virtuell deltaker. Når deres team er geografisk splittet eller du har et begrenset reisebudsjett kan du benytte deg av vår virtuelle klasserom. Kursinnholdet er akkurat det samme som i et vanlig klasserom og deltakerne får en instruktør "live" via internett. Deltaker kan chatte og snakke med sin instruktør og sine medstudenter. Global Knowledge vil sende deg all informasjon du trenger før kurset slik at du kan teste innlogging.

Målgruppe:

Anyone requiring an understanding of the Cisco Contact Center Enterprise solution

Agenda:

- **After completing this course, you should be able to:**
- Provide a high-level overview of the Cisco Contact Center portfolio
- List the key components within the Packaged Contact Center Enterprise (PCCE) architecture and their functions
- Describe how calls flow through PCCE using appropriate terms and naming conventions
- Introduce the tools used in the configuration, scripting, reporting and support of a PCCE deployment
- Identify advanced features available within the PCCE solution

Forkunnskaper:

Attendees should meet the following prerequisites:

- Basic knowledge of networking (Windows Active Directory, SQL) and components (servers, routers, switch) is helpful but not required
- Working knowledge of Unified Communications Manager and Voice Gateways
- Basic understanding of IP networks
- CCNA - Implementing and Administering Cisco Solutions
- CLFNDU - Understanding Cisco Collaboration Foundations

Test og sertifisering

Recommended as preparation for the following exams:

- TBC

Påfølgende kurs:

- CCEA - Administering Cisco Contact Center Enterprise
- CCEAA - Administering Advanced Cisco Contact Center Enterprise
- CCER - Reporting Cisco Contact Center Enterprise
