
Certified Information Privacy Manager

Varighet: 2 Days Kurskode: CIPM Opplæringsmetoder: Virtuell opplæring

Beskrivelse:

In this course you will gain foundational knowledge on both broad and global concepts of privacy and data protection laws and practice. You will learn common principles and approaches to privacy as well as understand the major privacy models employed around the globe. An introduction to information security concepts and information security management and governance will be covered including frameworks, controls, and identity and access management. You will also learn about online privacy as it relates to using personal information on websites and other internet-related technologies.

You will learn how to create a privacy program at an organizational level, develop and implement a framework, and establish metrics to measure program effectiveness. In an interactive format applying practices to a real-world scenario, you will review privacy program practices through the privacy life cycle: assess, protect, sustain and respond.

The CIPM designation is accredited under the internationally recognized ANSI/ISO standard 17024:2012, an acknowledgement of the quality and integrity of the programme.

This two-day programme covering practices in managing information privacy includes:

Official IAPP CIPM Participant Guide Official IAPP CIPM Textbook Official IAPP CIPM Practice Test IAPP CIPM Certification Exam One-Year IAPP Membership

Your contact information must be provided to the IAPP for membership services fulfilment

Virtuell opplæring

V&C Select™ er et veldig enkelt konsept og svært fleksibelt. Du kan delta personlig i klassen eller som virtuell deltaker. Når deres team er geografisk splittet eller du har et begrenset reisebudsjett kan du benytte deg av vår virtuelle klasserom. Kursinnholdet er akkurat det samme som i et vanlig klasserom og deltakerne får en instruktør "live" via internett. Deltaker kan chatte og snakke med sin instruktør og sine medstudenter. Global Knowledge vil sende deg all informasjon du trenger før kurset slik at du kan teste innlogging.

Målgruppe:

Individuals who need an understanding of practices in managing information privacy and data protection and those interested in pursuing CIPM certification.

Agenda:

- | | |

Test og sertifisering

Certified Information Privacy Manager (CIPM)

Påfølgende kurs:

Certified Information Privacy Technologist (CIPT) Prep Course

Innhold:

Day One	Unit 3: Information Security: Safeguarding Personal Information	This Programme is broken into two segments. The first segment describes important practices in managing privacy. The second segment is an interactive format in which participants apply these practices to a real-world scenario.
Module 1: Fundamentals of Information Privacy	This unit presents introductions to information security, including definitions, elements, standards, and threats/vulnerabilities, as well as introductions to information security management and governance, including frameworks, controls, cryptography and identity and access management (IAM).	
Unit 1: Common Principles and Approaches to Privacy	Unit 4: Online Privacy: Using Personal Information on Websites and with Other Internet-related Technologies	Unit 1: Privacy Programme Governance
This unit includes a brief discussion about the modern history of privacy, an introduction to types of information, an overview of information risk management and a summary of modern privacy principles.		This unit describes how to create a privacy Programme at an organisational level, develop and implement a framework, and establish metrics to measure Programme effectiveness. Topics include: creating a company vision for its privacy Programme; establishing a privacy Programme that aligns to the business; structuring the privacy team; developing organisational privacy policies, standards and guidelines; defining privacy Programme activities; and defining Programme metrics.
Unit 2: Jurisdiction and Industries	This unit discusses the web as a platform, as well as privacy considerations for sensitive online information, including policies and notices, access, security, authentication identification and data collection. Additional topics include children's online privacy, email, searches, online marketing and advertising, social media, online assurance, cloud computing, and mobile devices.	Unit 2: Privacy Operational Life Cycle
This unit introduces the major privacy models employed around the globe and provides an overview of privacy and data protection regulation by jurisdictions and by industry sectors.		This substantial unit reviews privacy Programme practices through the privacy life cycle: assess, protect, sustain and respond. Topics include: documenting the privacy baseline of the organisation; data processors and third-party vendor assessments; physical assessments; mergers, acquisitions and divestitures; privacy threshold analysis; privacy impact assessments; information security practices; Privacy by Design; integrating privacy requirements across the organisation' auditing your privacy Programme; creating awareness of the organisation's privacy Programme; compliance monitoring; handling information requests; and handling privacy incidents.
	Day 2	
	Module 2: Privacy Management
