## IMS Database Recovery Control (DBRC)

**Varighet: 5 Days**    **Kurskode: CM20G**    **Opplæringsmetoder: Virtuell opplæring**

---

### Beskrivelse:

Learn all aspects, including installation, implementation, and management of the Database Recovery Control (DBRC) feature of Information Management System (IMS). DBRC is an IMS facility that provides database recovery, and facilitates database sharing, between IMS systems in all IMS environments including DB/TM, Data Base Control (DBCTL), and Batch. Reinforce the concepts and skills you have learned with machine labs.

#### Virtuell opplæring

V&C Select™ er et veldig enkelt konsept og svært fleksibelt. Du kan delta personlig i klassen eller som virtuell deltaker. Når deres team er geografisk splittet eller du har et begrenset reisebudsjett kan du benytte deg av vår virtuelle klasserom. Kursinnholdet er akkurat det samme som i et vanlig klasserom og deltakerne får en instruktør "live" via internett. Deltaker kan chatte og snakke med sin instruktør og sine medstudenter. Global Knowledge vil sende deg all informasjon du trenger før kurset slik at du kan teste innlogging.

---

### Målgruppe:

This is an advanced course for IMS system programmers, Data Base Administrators (DBA) and technical support individuals who need to understand DBRC installation, customization, administration and maintenance in an IMS System.

---

### Agenda:

- Install, implement, and manage the DBRC (DataBase Recovery Control) component of IMS (Information Management System)
  - 
  - Identify and list the basic elements of DBRC
  - 
  - Describe the processing of DBRC records
  - 
  - Describe the data sharing environment
  - 
  - Describe the subsystem interaction and database authorization process
  - Register full-function, Fast Path, HALDB, and non-recoverable databases, and their data sets
  - 
  - Define and register Database Data Set Groups, Data Groups, and Recovery Groups
  - 
  - Define and register change accumulation groups
  - 
  - Describe installation tasks for DBRC and RECON (REcovery CONTROL) data sets
- 

### Forkunnskaper:

You should have completed:

- IMS Fundamentals (CM010)
- or IMS Fundamentals - Web - ILO (CMW01)
- or have equivalent knowledge

You should also have a minimum of 12 months system programming or database administration experience with IMS databases.

---

## Innhold:

- DBRC Implementation
- Database Registration
- Recording Log Information
- Data Sharing
- Subsystem Authorization
- GENJCL (GENerate JCL)
- Utilities
- RECON Maintenance and Recovery
- Security
