

Implementing Cisco Application Centric Infrastructure

Varighet: 5 Days Kurskode: DCACI Version: 1.0 Opplæringsmetoder: Virtuell opplæring

Beskrivelse:

The **Implementing Cisco Application Centric Infrastructure (DCACI)** v1.0 course show you how to deploy and manage the Cisco® Nexus® 9000 Series Switches in Cisco Application Centric Infrastructure (Cisco ACI®) mode. The course gives you the knowledge and skills to configure and manage Cisco Nexus 9000 Series Switches in ACI mode, how to connect the Cisco ACI fabric to external networks and services, and fundamentals of Virtual Machine Manager (VMM) integration. You will gain hands-on practice implementing key capabilities such as fabric discovery, policies, connectivity, VMM integration, and more.

The course will help you to gain skills and hands-on practice implementing Cisco Nexus 9000 Series Switches in ACI mode, to prepare for the Implementing Cisco Application Centric Infrastructure (300-620 DCACI) exam, and to qualify for the professional-level and expert-level data center job roles.

Virtuell opplæring

V&C Select™ er et veldig enkelt konsept og svært fleksibelt. Du kan delta personlig i klassen eller som virtuell deltaker. Når deres team er geografisk splittet eller du har et begrenset reisebudsjett kan du benytte deg av vår virtuelle klasserom. Kursinnholdet er akkurat det samme som i et vanlig klasserom og deltakerne får en instruktør "live" via internett. Deltaker kan chatte og snakke med sin instruktør og sine medstudenter. Global Knowledge vil sende deg all informasjon du trenger før kurset slik at du kan teste innlogging.

Agenda:

| ■ Describe Cisco ACI Fabric Infrastructure and basic Cisco ACI concepts | ■ Describe VMM Integration |
| ■ Describe Cisco ACI policy model logical constructs | ■ Describe Layer 4 to Layer 7 integrations |
| ■ Describe Cisco ACI basic packet forwarding | ■ Explain Cisco ACI management features |

Forkunnskaper:

To fully benefit from this course, you should have the following knowledge and skills:

- Understanding of networking protocols, routing, and switching
 - Familiarity with Cisco Ethernet switching products
 - Understanding of Cisco data center architecture
 - Familiarity with virtualization fundamentals
- These are the recommended Cisco learning offerings that may help you meet these prerequisites:
- Implementing and Administering Cisco Solutions (CCNA) v1.0
 - Understanding Cisco Data Center Foundations (DCFNDU) v1.0
 - Introducing Cisco Data Center Networking (DCICN) v6.2
 - Introducing Cisco Data Center Technologies (DCICT) v6.2
 - Interconnecting Cisco Networking Devices: Accelerated (CCNAX) or Interconnecting Cisco Networking Devices Part 1 (ICND1) and Interconnecting Cisco Networking Devices Part 2 (ICND2)

Test og sertifisering

The 300-620 DCACI exam certifies your knowledge of Cisco switches in ACI mode including configuration, implementation, and management. The exam will be available beginning February 24, 2020.

After you pass 300-620 DCACI:

You earn the Cisco Certified Specialist – Data Center ACI Implementation certification.

You will have satisfied the concentration exam requirement for new CCNP Data Center certification. To complete CCNP Data Center, you also need to pass the Implementing and Operating Cisco Data Center Core Technologies (350-601 DCCOR) exam or its equivalent.
