

Organizational Change Management

Duration: 3 Days Course Code: 7655

Overview:

Learn how to manage your projects more effectively by incorporating organizational change initiatives.

Today's organizations must integrate and align people, processes, structures, culture, and strategy in order to successfully transition individuals and groups from a current state to a desired future state, such that the desired outcomes and business objectives are achieved. Unfortunately, many project managers still view their primary responsibility as managing specific business functions (resources, time, scope, budgets, etc.) and have a difficult time understanding and properly integrating organizational change management activities through successful strategic execution.

This course focuses on change management in the areas of standardized portfolio, program, and project management practices. All key concepts necessary to manage strategic and tactical changes are covered through a mix of inspiring lectures and exercises.

Project Managers are charged with the additional responsibility for making change happen in and through the different levels of strategic execution.

Virtual Learning

This interactive training can be taken from any location, your office or home and is delivered by a trainer. This training does not have any delegates in the class with the instructor, since all delegates are virtually connected. Virtual delegates do not travel to this course, Global Knowledge will send you all the information needed before the start of the course and you can test the logins.

Target Audience:

Project managers, senior project managers, IT managers and professionals, program managers, portfolio managers, HR managers and executives, organizational development professionals, project sponsors and executives, functional managers, project coordinators and administrators, project analysts, project leaders, team leaders, product managers, R&D managers, project team members and any other project or program related functions across all industry domains.
