

Red Hat JBoss Application Administration I

Duration: 5 Days Course Code: AD248

Overview:

JBoss® Application Administration I teaches you the best practices for installing and configuring Red Hat JBoss Enterprise Application Platform 7. Through hands-on labs, learn the essential, real-world tasks that a system administrator needs to know to effectively deploy and manage applications on JBoss Enterprise Application Platform.

Target Audience:

System administrators who are both new to JBoss and have experience with JBoss Enterprise Application Platform 5/6

Prerequisites:

- Base experience with system administration on Microsoft Windows, UNIX, or Linux® operating systems
- Understanding of hardware and networking

No prior knowledge of Java, scripting, or JBoss Developer Studio required

Testing and Certification

After completing this course, you should be prepared to take the JBoss Certified Application Administrator (JBCAA) exam (EX248).

Content:

- Install and run JBoss Enterprise Application Platform 7 in standalone mode and domain mode.
- Configure a domain.
- Deploy applications to JBoss Enterprise Application Platform 7.
- Configure the datasource subsystem.

- Configure Java™ Message Service (JMS) and HornetQ.
- Configure the logging subsystem.
- Configure the web subsystem.
- Implement application security in JBoss Enterprise Application Platform 7.

- Migrate JBoss Enterprise Application Platform 5/6 applications to JBoss Enterprise Application Platform 7.
- Get an introduction to clustering
