

EC-Council Certified Secure Computer User (CSCU) + Exam voucher

Duration: 2 Days **Course Code: CSCU**

Overview:

The purpose of the CSCU training program is to provide individuals with the necessary knowledge and skills to protect their information assets. This class will immerse students into an interactive environment where they will acquire a fundamental understanding of various computer and network security threats such as identity theft, credit card fraud, online banking phishing scams, virus and backdoors, emails hoaxes, sex offenders lurking online, loss of confidential information, hacking attacks and social engineering. More importantly, the skills learned from the class helps students take the necessary steps to mitigate their security exposure.

This course prepares an individual to sit for CSCU exam 112-12 This certification is an excellent complement to educational offerings in the domain of security and networking.

Virtual Learning

This interactive training can be taken from any location, your office or home and is delivered by a trainer. This training does not have any delegates in the class with the instructor, since all delegates are virtually connected. Virtual delegates do not travel to this course, Global Knowledge will send you all the information needed before the start of the course and you can test the logins.

Target Audience:

This course is specifically designed for today's computer users who use the internet extensively to work, study and play.
Course Duration: 16 Hours

Objectives:

- Educational institutions can provide greater value to students by providing them not only with one of the most updated courses available today, but also a certification that empowers students in the corporate world.
-
