## DevOps Institute: DevOps Foundation (DOFD)<sup>®</sup> - Including Exam

**Duration: 2 Days**    **Course Code: DEVOPSF**

---

### Overview:

This course is an introduction to DevOps. The course emphasizes communication, collaboration, integration, and automation to improve the workflow between developers and IT operations professionals. Improved workflows lead to more opportunities to design software and services in a more agile fashion which can only be good for customers.

This course (based on the DevOps Institute syllabus) is intended as a basis for discovering the most important DevOps concepts and to understand the principles and methods behind this. The course will leave you with the inspiration to be the advocate of change; The idea is that what you have learned about DevOps - and continue to learn – is shared with others so that you can guide them.

### Virtual Learning

This interactive training can be taken from any location, your office or home and is delivered by a trainer. This training does not have any delegates in the class with the instructor, since all delegates are virtually connected. Virtual delegates do not travel to this course, Global Knowledge will send you all the information needed before the start of the course and you can test the logins.

---

### Target Audience:

The course is aimed at: -  
Those engaged in IT development, IT operations and IT service management.

Individuals wishing to have detailed understanding of the principles of DevOps

IT professionals working in an Agile environment or will do, and who need a detailed understanding of the interaction between Agile and DevOps

Individuals who want to understand the cultural changes DevOps entails

---

### Objectives:

- After completing the course, students are familiar with the following aspects of DevOps :
    - Objectives and concepts
    - Company benefits
    - Performance criteria and results in the real world
    - DevOps principles
    - Concepts and methods ( including the relationship between Agile , Lean and IT Service Management ( ITSM) )
  - Cultural and organizational considerations
  - Methods of communication and collaboration
  - Methods for automation and technology factors
  - Considerations when changing
  - Challenges, risks and critical success factors
- 

### Prerequisites:

No previous knowledge of DevOps is required

### Testing and Certification

The course is followed by an examination leading to the award of the DevOps Institute "**DevOps Foundation Certificate**"

- Closed book
  - Paper or web based
  - 40 multiple-choice questions
  - Passing Score: 65%
  - Exam duration: 60 minutes
-

---
