

## Red Hat Single Sign-On Administration

**Duration: 2 Days**    **Course Code: DO313**

### Overview:

*Red Hat Single Sign-On Administration (DO313)* is designed for system administrators who want to install, configure and manage Red Hat Single Sign-On servers for securing applications. Learn about the different ways to authenticate and authorize applications using single sign-on standards like OAuth and OpenID Connect (OIDC). You will also learn how to install and configure Red Hat Single Sign-On on the OpenShift Container Platform. This course is based on Red Hat Single Sign-On version 7.6.

### Target Audience:

System Administrators responsible for administering Red Hat Single Sign-On servers.

### Objectives:

- Installing Red Hat Single Sign-On on virtual machines and on OpenShift Container Platform
- Authenticating and authorizing applications using OAuth and OIDC
- Configuring Identity Brokering and user identity federation from external systems
- Configuring password policies

### Prerequisites:

- Experience with writing web based applications using Node.js, HTML5, Quarkus, or Java EE/Jakarta EE is recommended but not required.
- Recommended not required:
- AD248 - Red Hat JBoss Application Administration I

### Content:

Introduce Red Hat Single Sign-On	Authentication and Authorization	Red Hat Single Sign-On on OpenShift
Identify the main components of Red Hat Single Sign-On	Configure authentication and authorization for applications	Install and configure Red Hat Single Sign-On on OpenShift
Install and Configure Red Hat Single Sign-On	Identity Brokering and User Federation	
Identify the best option for installing and configuring RHSSO depending on the infrastructure	Configure RHSSO to secure applications from multiple identity providers by using user federation and social logins	

## Additional Information:

### **Technology considerations**Internet access is required.
