

AWS Discovery Day: Securing your AWS Cloud

Duration: 1 Day **Course Code: GKAWS-SOA**

Overview:

The AWS Discovery Day is free of charge virtual event that is designed to introduce AWS cloud computing concepts and foundational infrastructure services. Whether you are thinking of migrating to the AWS Cloud or already have a workload running on AWS, securing your data and resources should be at the top of the list. This event introduces several AWS services you can use to improve your security posture. The event covers the different security design principles that will help you to plan your security approach in the AWS Cloud and provides information on resources you can use to further your knowledge around security on AWS

Company Events

These events can be delivered exclusively for your company at our locations or yours, specifically for your delegates and your needs. The Company Events can be tailored or standard course deliveries.

Content:

Define the cloud and how it works

Describe the basic global infrastructure of the cloud

Describe the different design principles for security in the cloud

Explain the benefits of the AWS Cloud

Identify security benefits and responsibilities of using the AWS Cloud

Determine which AWS services you can use to improve your security posture
