
Junos Space Essentials

Duration: 3 Days Course Code: JSE Version: 17.a

Overview:

This three-day course is designed to provide students with the knowledge required to manage the Junos Space appliance and manage devices with Junos Space. Students will understand how to install Junos Space into a multinode Space Fabric, as well as learn how to administer and monitor the Fabric. Centralized Junos device management options offered by the Junos Space Network Management Platform will be explored, including configuration backup, synchronization, Junos image distribution, and application of templates. Students will also learn how to use Junos Space applications, such as Service Now and Service Insight. Through demonstrations and hands-on labs, students will gain experience installing Junos Space into a multinode Space Fabric, navigating the administrative environment, monitoring the Fabric, performing schema updates, and using Junos Space applications. This course uses the Junos Space virtual appliance for the hands-on component and is based on Junos Space Release 17.1R1.7.

Target Audience:

This course benefits individuals responsible for managing Junos devices using the Junos Space software.

Objectives:

- | | |
|---|--|
| ■ Explain the need for Junos Space software. | ■ Work with the monitoring topology section and manage nodes. |
| ■ Explain Junos Space architecture. | ■ Manage outages. |
| ■ List and identify the components and applications of Junos Space. | ■ Describe the differences between Template Definitions and Templates. |
| ■ List the two different form factors available for Junos Space. | ■ Create and use templates and template definitions. |
| ■ Perform the initial installation of a Junos Space appliance. | ■ Create Quick Templates. |
| ■ Explain how security is provided to Junos Space. | ■ Create and deploy CLI Configlets. |
| ■ Explain how to use the Junos Space GUI. | ■ Describe Automated Support and Prevention (ASAP) benefits. |
| ■ Describe how Junos Space manages jobs. | ■ Explain Service Now application processes. |
| ■ Demonstrate user role differences within Junos Space. | ■ Describe the Service Insight platform settings. |
| ■ Explain how to manage the Junos Space platform. | ■ Describe multinode Junos Space deployment |
| ■ Describe how Junos Space discovers and manages devices. | ■ Describe the reports function. |
| ■ Edit device configurations. | ■ Explain the purpose of report definitions. |
| ■ List the purposes of network monitoring. | ■ Describe how to generate reports |
-

Prerequisites:

■

Content:

1. COURSE INTRODUCTION:

- What Is Junos Space?
 - Junos Space Architecture
 - Junos Space Applications
-
- Two Form Factors
 - Junos Space Initial Setup
 - Initial Setup of Primary Node
 - Junos Space Security
 - Junos Space GUI
 - Lab 1: Deploying Junos Space
-
- Fabric Overview
 - Fabric Creation
 - FMPM Nodes
 - High Availability Failover Scenarios
 - Lab 2: Deploying Junos Space Fabric

Day 2:

5 .Platform Administration:

- Job Management
- User Roles
- Application Management
- Lab 3: Adminstrating the Platform

6 .Device Management

- Discovering and managing devices
- Device management
- Device Configuration
- Lab 4: Network Management Platform

7 .Junos Space Templates

- Templates Introduction
- Template Definitions
- Template creation and application
- Quick templates
- CLI Configlets
- Lab 5: Creating and Applying Templates

Day 3:

- Network Monitoring Overview
- Network Monitoring Topology
- Managing Nodes
- Searching for Nodes and Assets
- Managing Outages
- Events, Alarms, and Notifications
- Managing Reports and Charts
- Lab 6: Network Monitoring

10. Reports :

- Overview
 - Report Definitions
 - Generating Reports
 - Lab 8: Working with Reports
-
- Service Automation
 - Service Now
 - Service Insight
 - Lab 7: Automated Support and Prevention
