Microsoft Copilot Overview for IT Professionals

Duration: 1 Day Course Code: M55616A

Overview:

Microsoft Copilot Overview for IT Professionals (M55616A) is a one-day introductory course designed to help IT professionals, administrators, and technology decision-makers understand the Microsoft Copilot ecosystem and its role in modern workplace productivity. Participants explore the core concepts behind Copilot, including how generative AI, Microsoft Graph, and enterprise data work together to deliver intelligent assistance across Microsoft 365, Windows, Edge, and business applications
Throughout the course, learners gain insight into the various Copilot offerings available across the Microsoft platform, including Microsoft 365 Copilot, Copilot in Windows and Edge, Dynamics 365 Copilot, Security Copilot, GitHub Copilot, and Copilot Studio. The course also covers deployment considerations, licensing, data governance, security, responsible AI practices, and techniques for optimizing Copilot through effective prompting and extensibility options such as plugins and Microsoft Graph connectors. By the end of the course, participants will be equipped to evaluate, plan, and support Copilot adoption within their organizations while understanding the productivity, governance, and operational benefits these AI-powered tools can provide.
