

New Features in Red Hat Enterprise Linux RHEL10 (RH304)

Duration: 3 Days **Course Code: RH304**

Overview:

Explore new features and changes in Red Hat Enterprise Linux 10 to prepare for deployment.

"New Features in Red Hat Enterprise Linux" prepares students to successfully deploy Red Hat Enterprise Linux 10 by exploring its new features and enhancements.

This course enables students to identify the key differences and improvements to leverage RHEL 10's full potential. Topics include performance optimization, security enhancements, and user interface changes

This course empowers students to implement the system effectively and to maximize its capabilities in their environment and enables them to upskill, focusing on the latest advancements of RHEL 10.

Note: Starting January 1, 2026, Red Hat introduces RHLS-Course — a flexible subscription model now included with this catalog offering. This replaces the previous direct virtual class enrollment from Global Knowledge.

When you purchase this item, you'll receive an RHLS subscription at the course level, giving you the freedom to choose the schedule that works best and self-enroll in your selected class.

Your RHLS subscription includes:

- One live, instructor-led virtual session
- 12 months of self-paced learning access
- One certification exam with a free retake

Onsite Classroom-based sessions and closed course options remain unchanged.

Updated Jan2026

Virtual Learning

This interactive training can be taken from any location, your office or home and is delivered by a trainer. This training does not have any delegates in the class with the instructor, since all delegates are virtually connected. Virtual delegates do not travel to this course, Global Knowledge will send you all the information needed before the start of the course and you can test the logins.

Target Audience:

System administrators, platform engineers, developers, and other IT professionals with experience managing Red Hat Enterprise Linux 9 and earlier that need to prepare for Red Hat Enterprise Linux 10 deployment and operations.

Objectives:

- After this course participants should be able to:
- Describe selected improvements and feature changes in Red Hat Enterprise Linux 10.
- Install RHEL 10 in package mode, interactively or by using Kickstart.
- Get AI-driven guidance and suggestions to efficiently manage a RHEL server by using Red Hat Enterprise Linux Lightspeed.
- Install, upgrade, and use desktop software from the Red Hat Ecosystem Catalog by using Flatpak.
- Manage containers and container images with the updated container management tools.
- Create, use, install, and upgrade containers and servers that use image-based installation management.

Prerequisites:

- Red Hat System Administration I (RH124) - Ver 9.3 or older RHEL versions or equivalent experience
 - Red Hat System Administration II (RH134) - Ver 9.3 or older RHEL versions or equivalent experience
- Take Red Hat free assessment to gauge whether this offering is the best fit for your skills [Red Hat Skills Assessment](#)

Testing and Certification

■

Follow-on-Courses:

- Red Hat Enterprise Linux Automation with Ansible (RH294 - AU294)
 - RH294 - Red Hat Enterprise Linux Automation with Ansible
-

Content:

1- Overview of Red Hat Enterprise Linux 10

Describe selected improvements and feature changes in Red Hat Enterprise Linux 10.

2- Installing Red Hat Enterprise Linux

Install Red Hat Enterprise Linux in package mode, either interactively or by using Kickstart.

3- Getting AI-assisted Help with Red Hat Enterprise Linux Lightspeed

Get AI-driven guidance to efficiently manage a RHEL server by using Red Hat Enterprise Linux Lightspeed.

4- Installing and Updating Applications by Using Flatpak

Install, upgrade, and use desktop software that is provided from the Red Hat Ecosystem Catalog by using Flatpak.

5- Managing Containers with Podman

Manage containers and container images with the latest version of container management tools.
