IBM Cloud Pak for AIOPs Administration and Configuration v4.10

Duration: 2 Days Course Code: TN408G

Overview:

Learn the key skills required to administer IBM Cloud Pak for AIOps and streamline IT operations through monitoring, correlation, and automation capabilities.

This course is designed to teach you how to do important post-installation administration and configuration tasks for the IBM Cloud Pak for AIOps platform. Such tasks include user management, importing topology, configuring self-monitoring, configuring correlations, and making runbooks to expedite or automate solutions to IT problems.

Updated 9/2026

Target Audience:

This course is intended for system administrators who are responsible for doing post-installation administration and configuration tasks of IBM Cloud Pak for AIOps.

Objectives:

- **After this course participants should be able to:**
- Understand how machine learning applies to IT operations problems.
- Describe key features of IBM Cloud Pak for AIOps.
- Explain IBM Cloud Pak for AIOps architecture.
- Understand Red Hat OpenShift concepts and terminology.
- Manage users and groups.
- Integrate the IBM Cloud Pak for AIOps console with an LDAP user repository.
- Troubleshoot your environment.
- Configure self-monitoring for OMNIbus ObjectServer and IBM Cloud Pak for AIOps.
- Monitor your Cloud Pak deployment with the topology service.
- View runbook history.

Prerequisites:

Basic knowledge of IBM Cloud Pak for AIOps, Red Hat OpenShift, and IT operations is recommended.

Testing and Certification

None

Follow-on-Courses:

None

Content:

Day 1

00:15 Course Introduction

01:30 Unit 1. IBM Cloud Pak for AIOps Overview

00:45 Exercise 1. Understand Your Lab Environment

01:00 Unit 2. Build Connections to IBM Cloud Pak for AIOps

01:00 Exercise 2. Build Connections to IBM Cloud Pak for AIOps

01:00 Unit 3. Essential Troubleshooting Skills

01:30 Exercise 3. Essential Troubleshooting Skills

01:00 Unit 4. Configuring Self-Monitoring

01:00 Exercise 4. Configuring Self-Monitoring

Day 2

01:00 Unit 5. Temporal, Seasonal, and Scope-Based Correlations

01:00 Exercise 5. Temporal, Seasonal, and Scope-Based Correlations

01:30 Unit 6. Topology Import and Event Correlation

02:30 Exercise 6. Topology Import and Event Correlation

01:30 Unit 7. Using Runbooks, Actions, and Policies

01:30 Exercise 7. Using Runbooks, Actions, and Policies

00:15 Unit 8. Course Summary
