

Business Skills for IT Professionals

Duration: 2 Days Course Code: BSITP100E

Overview:

In a world of functional interdependencies, live and online communication, internal and external customer service expectations, and business outsourcing, interpersonal skills—or lack of them—are affecting individual and team performance more than ever. Research such as that by Professor Robert Kelley from Carnegie Mellon Tepper School of Business has demonstrated clearly that technical skills alone do not distinguish standout employees. Competencies such as initiative and business awareness, as well as skills in leadership, collaboration, communication also factor in.

The Business Skills for IT Professionals Program is a two day workshop designed specifically to equip technical professionals with the inter-personal skills required to succeed in today's demanding business environment.
