

Cisco SIP, Cisco Unified Border Element, and Gateways

Duration: 5 Days Course Code: CSCGW Version: 2.0 Delivery Method: Virtual Classroom

Overview:

Unlock the full power of Cisco Unified Border Element and SIP in this hands-on, expert-led course.

You'll begin by mastering the foundational elements of Cisco Unified Communications networks, including gateway call routing, voice port configuration, and DSP functionality and then diving deep into technologies at the heart of modern voice solutions: SIP and Cisco Unified Border Element. You'll master SIP call flows, SIP normalization, and Cisco Unified Border Element dial-peer strategies and implementations. Then explore the Cisco Unified Border Element's advanced capabilities. From secure and seamless SIP trunk integrations to hybrid cloud calling and call recording, you'll see how Cisco Unified Border Element serves as a core component in modern voice deployments.

Virtual Learning

This interactive training can be taken from any location, your office or home and is delivered by a trainer. This training does not have any delegates in the class with the instructor, since all delegates are virtually connected. Virtual delegates do not travel to this course, Global Knowledge will send you all the information needed before the start of the course and you can test the logins.

Target Audience:

Network engineers, architects, and support staff who:

- Maintain and configure voice and data network devices
- Are considering various methodologies to implement VoIP
- Require a fundamental understanding of the issues and solutions related to implementation
- Require a fundamental understanding of packet telephony technologies that are common for both enterprise and service provider applications

Objectives:

- | | |
|--|--|
| ■ In this course, you will: | ■ Utilize Digit Manipulation Features on Cisco IOS Gateways |
| ■ Gain Insight into the Cisco Collaboration Solutions Architecture | ■ Control Calling Privileges |
| ■ Develop Knowledge of Cisco Voice Gateways | ■ Work with MGCP Gateways |
| ■ Become Familiar with Gateway Protocols | ■ Review the Fundamentals of H.323 |
| ■ Describe a Basic Dial Plan | ■ Explore Signaling and Media Protocols |
| ■ Explore Cisco Unified Communications Manager Media Resources | ■ Describing Call Signaling for Call Setup and Teardown |
| ■ Configure Gateway Voice Ports | ■ Introduce Yourself to Cisco Unified Border Element |
| ■ Recognize the Role of DSPs | ■ Explore Advanced Cisco Unified Border Element Dial-Peer Features |
| ■ Comprehend Call Signaling Over IP Networks | ■ Break Down SIP Signaling Protocol |
| ■ Explore Codecs | ■ Assess Cisco Unified Border Element capabilities |
| ■ Identify Key Requirements for VoIP Call Legs | ■ Review Signaling and Media Bindings, Toll Fraud Prevention |
| ■ Apply Configuration Techniques to VoIP Call Legs | ■ Support Multiple Trunks Using Tenants |
| ■ Summarize Dial Peers | ■ Bridge Cloud Calling with Hybrid Local Gateway |
| ■ Clarify the Relationship between Call Legs and Dial Peers | ■ Monitor and Record Calls Effectively |

Prerequisites:

- CCNA level skills or similar networking experience.
 - CLFNDU - Understanding Cisco Collaboration Foundations
-

Content:

Module 1: Introduction to VGW

- L1: Understanding Cisco Unified Communications Networks and the Role of Gateways.
- L2: Gateway Call Routing and Call Legs
- L3: Configuring Gateway Voice Ports
- L4: Understanding DSP Functionality, Codecs, and Codec Complexity

Module 2: VoIP Call Legs

- L1: Examining VoIP Call Leg Characteristics and VoIP Media Transmission
- L2: Describing Requirements for VoIP Call Legs ; Configuring VoIP Call Legs

Module 3: Dial Plan Implementation

- L1: Describing Digit Manipulation
- L2: Configuring Path Selection
- L3: Configuring Calling Privileges

Module 4: VoIP Signaling Protocols

- L1: MGCP
- L2: H323
- L3: SIP (SIP Overview, SIP Messages, SIP Servers, SDP and Media negotiation, SIP Call Setup Types)

Module 5: Cisco Unified Border Element

- L1: Examining Cisco Unified Border Element
- L2: Explore Advanced Cisco Unified Border Element Dial-Peer Features
- L3: Using SIP Normalization with Cisco Unified Border Element
- L4: Cisco Unified Border Element Signaling and Media Bindings, Toll Fraud Prevention
- L5: Multiple Trunks Using Tenants

Module 6: Cisco Unified Border Element applications

- L1: Cloud Calling Hybrid Local Gateway
- L2: Cisco Unified Border Element Call Recording and Monitoring

LABS

- Use Certificates
 - Configure IP Network Protocols
 - Create a Basic Dial Plan
 - Explore Partitions and Call Search Spaces
 - Configure VoIP Dial Peers
 - Configure and Troubleshoot Collaboration Endpoints
 - Troubleshoot Calling Issues
 - Configure Regions and Locations
 - Configuring VoIP Call Legs
 - Configure and Troubleshoot ISDN PRI
 - Examine Cisco IOS Gateway Inbound and Outbound Dial-Peer Functions
 - Implement and Troubleshoot Digit Manipulation on a Cisco IOS Gateway
 - Implement PSTN Calling Using MGCP Gateways
 - Analyze SIP, H.323, and Media Protocols
 - Troubleshoot SIP and Media Protocols
 - Implement Cisco Unified Border Element
 - Implementing Cisco Unified Border Element
 - Troubleshoot Cisco Unified Border Element
 - Implement Call Recording and Monitoring Using a SPANBased Solution
-

Additional Information:

This course can be purchased with Cisco Learning Credits (CLCs).
