

# Veritas NetBackup 7.7: Administration

## Duration: 5 Days Course Code: DP0134

#### Overview:

The NetBackup 7.7: Administration course provides the IT professional with instruction on the functionality of NetBackup 7.7 software. This course covers the general principles of using NetBackup to develop and implement a storage management strategy, including how to:Configure and operate NetBackup 7.6.1.Manage NetBackup using the graphical interfaces, commands, and scripts.Provide service protection and recovery.Use the NetBackup Activity Monitor, NetBackup reports, and OpsCenter to monitor NetBackup activity.

### **Target Audience:**

This course is intended for technical professionals responsible for the design, configuration, operation, monitoring, or support of NetBackup.

## **Objectives:**

- By the completion of this course, you will be able to:
- Discuss the challenges of performing backups in today's enterprise computing environments.
- Describe the functions of the master server, media servers, and clients.
- Diagram the NetBackup product architecture.
- Define common terms used in the NetBackup product.
- Describe how NetBackup backs up and restores data.
- Identify NetBackup options and agents.
- Use the NetBackup Administration Console and OpsCenter.
- Configure and manage basic disk storage units and storage unit groups.
- Configure file system backup policies and schedules.
- Perform manual backups and user-directed backups.
- Restore files using the Java or Windows BAR interface and OpsCenter Operational Restore.
- Monitor NetBackup backup and restore jobs and perform basic troubleshooting and information-gathering steps related to failing jobs.
- Configure and manage AdvancedDisk storage units and disk pools.

- Configure tape-based devices and volume pools; perform a robot inventory.
- Manage robot and tape drive settings, including media sharing.
- Monitor and manage media and media states.
- Configure, run, and manage virtual machine backups using VMware.
- Discuss other supported virtualization methods.
- Recover virtual machines, including using VMware Instant Recovery.
- Use the integrated NetBackup vSphere Web Client Plug-in for VMware.
- Describe the various methods of backup image duplication.
- Configure Storage Lifecycle Policies (SLPs) and initiate jobs that use SLPs.
- Manage the NetBackup catalog to search for, verify, duplicate, import, and expire backup images.
- Back up and recover the NetBackup catalogs.
- Optimize file system backups using incremental backups, True Image Restore, synthetic backups, NetBackup Accelerator, multiple data streams, and multiplexing.
- Identify and use resources for troubleshooting NetBackup, including the NetBackup logging assistant, and tools related to debug logging.

## Prerequisites:

## Content:

#### Introducing NetBackup

- Introduction to data protection
- The NetBackup environment
- NetBackup concepts
- Using the NetBackup Administration Console
- NetBackup appliance overview
- Using NetBackup OpsCenter

#### Configuring NetBackup Storage

- NetBackup storage device concepts
- Configuring NetBackup basic disk storage
- Verifying basic disk storage

#### Configuring Policies and Schedules

- Introduction to backup policies
- Creating and configuring policy attributes
- Creating a policy schedule
- Adding client to a policy
- Creating backup selections
- Managing existing policies

#### Performing File System Backups

- Using and customizing the NetBackup Activity Monitor
- Performing manual backup operations
- Performing user-directed backups
- Backup job-related tips

#### Performing File System Restores

- Introduction to restores
- Performing restore operations using the BAR interface
- Performing restore operations using OpsCenter Operational Restore
- Restore job-related tips

#### **Configuring Disk Pools**

- Understanding disk pools and AdvancedDisk
- Configuring AdvancedDisk
- Managing AdvancedDisk storage

#### Configuring Media Server Deduplication

- Introduction to NetBackup deduplication
  Configuring NetBackup media server
- deduplication
- Configuring client-side deduplication
  Managing NetBackup deduplication

#### Configuring Tape Storage

- Understanding Media Manager storage units
- Configuring tape devices
- Verifying tape storage
- NetBackup media concepts
- Configuring media

#### Managing Tape Storage

- Managing robots and tape drives
- Monitoring media and media states
- Managing tapes
- Media and device related tips

## Protecting Virtual Machines

- Introduction to virtual machine backups
- Configuring VMware backups
- Performing and Monitoring VM Backups
- NetBackup support for other virtualization solutions

#### **Recovering Virtual Machines**

- Managing VMware restores
- Using VMware Instant Recovery
- Using the NetBackup vSphere Web Client Plug-in

#### **Duplicating Backups**

- Backup duplication concepts
- Storage lifecycle policy concepts
- Using storage lifecycle policies
- Configuring optimized duplication
- Additional Storage Lifecycle Policy features and benefits

# Managing and Protecting the NetBackup Catalog

- Introduction to NetBackup catalogs
- Managing images
- Configuring a catalog backup policy
- Disaster recovery strategies

#### Optimizing File System Backups

- File system backup challenges
- Configuring for True Image Restores
- Using synthetic backups
- Optimizing file system incremental backups with change logs
- Using NetBackup Accelerator
- Using multiple data streams
- Optimizing tape drive performance using multiplexing
- Handling busy files on UNIX and Windows file systems

Collecting Logs and Diagnostic Information

- Support resource
- NetBackup processes, services, and daemons
- Introduction to Logging Assistant
- NetBackup and Media Manager logging overview
- Using the support utilities
