

Symantec Data Insight 4.5.1 Administration

Duration: 3 Days **Course Code: DP0146**

Overview:

The *Symantec Data Insight 4.5.1: Administration* course is designed for the storage administration, IT security, and systems administration professional tasked with architecting, implementing, administering and using Symantec Data Insight. This class covers how to design, install, configure, administer and maintain Symantec Data Insight.

Students will also learn how to use the core features of Data Insight to investigate risk, compliance and data management use cases.

Target Audience:

This course is for storage administrators, systems administrators, IT security administrators, systems professionals, and consultants who are charged with the installation, configuration, and day-to-day management of

Symantec Data Insight in a variety of system environments. It is also targeted at those who need to use Symantec Data Insight to monitor systems for IT security, compliance and data management use cases.

Objectives:

- By the completion of this course, you will be able to:
 - Describe Symantec Data Insight product components and the system architecture.
 - Install and configure Symantec Data Insight.
 - Add resources for system monitoring.
 - Integrate Data Insight with Symantec Data Loss Prevention and Symantec Enterprise Vault.
 - Use Symantec Data Insight to monitor system resources.
 - Create and manage Data Insight reports.
 - Create remediation workflows using the Self-Service portal.
 - Maintain a Data Insight deployment.
-

Prerequisites:

You must have a working knowledge of advanced computer terminology and Internet terms, and administrator-level knowledge of the Microsoft Windows 2008 R2 operating system.

Content:

Introduction to Data Insight

- Data Insight overview
- Understanding the Data Insight architecture
- Common Data Insight use cases
- Introduction to some of the key concepts of Data Insight
- Integration of Data Insight with other products

Installing Data Insight

- Planning a Data Insight deployment
- Installing Data Insight
- Post-installation configuration
- Upgrading Data Insight

Initial configuration of Data Insight

- Introduction to the Management Console
- Configuring administrative access
- Configuring directory services
- Configuring advanced server settings
- Configuring global settings

Adding resources for monitoring

- Introduction to the monitoring of resources by Data Insight
- Adding Windows file servers to Data Insight
- Adding NetApp filers to Data Insight
- Configuring DFS targets
- Adding and managing shares
- Adding SharePoint Web applications to Data Insight

Integrating Data Insight with DLP and Enterprise Vault

- Integrating Data Insight with Symantec Data Loss Prevention
- Integrating Data Insight with Symantec Enterprise Vault

Using Data Insight to monitor resources

- Using the Data Insight dashboards
- Using the Workspace
- Managing custodians
- Advanced analytics
- Policies and alerts

Data Insight reporting

- Introduction to Data Insight reporting
- Creating a report in Data Insight
- Creating custom reports using DQL

Using Data Insight for risk, compliance, and data management

- Using Data Insight for risk and compliance use cases
- Using Data Insight for data management use cases

Remediation workflows using the Self-Service Portal

- Introduction to remediation using the self-service portal
- Prerequisites for the self-service portal
- Entitlement Review workflow.
- DLP Incident Remediation workflow.
- Ownership Confirmation workflow
- Records Classification workflow

Maintaining Data Insight

- Monitoring the health of Data Insight
- Backing up and recovering Data Insight
- Managing data locations
