

## AWS Jam - Security Engineering

Duration: 1 Day Course Code: GK3338JAM

### Overview:

Accelerate your cloud adoption journey. Your team will gain practical knowledge and skills that they can take back and implement into your organizations cloud initiatives. With real-world challenges, your team will be equipped to handle real-world scenarios. AWS Jam is a scenario-based, team-centered 1 day event where participants gain practical experience with a wide range of AWS services. AWS Jam scenarios relate to use cases, domains, and services covered in the classroom training course. The event is gamified with teams competing against each other by scoring points for completing specific challenges. Challenges have varying degrees of difficulty and are therefore worth differing amounts of points. A live leaderboard provides updates on scores and progress throughout the event. Clues and guidance can be provided to help teams move through challenges, but cost points. To play, AWS provides participants and teams with access to pre-created infrastructure.

### Target Audience:

AWS Security professionals looking to enhance their real-world practical skills

### Objectives:

- Immersive engagements encourage you to up-level your skills on AWS

### Content:

- |   |  |   |
|---|--|---|
| - Hands-on format, putting learners in the driver's seat to make decisions and solve problems in an active AWS Cloud environment to amplify understanding | - Develop your team's skillsets in the AWS Cloud to advance your cloud adoption journey        | - Validate learning through reports on teams including benchmarks, completion times, and which challenges were the most difficult                   |
| - Challenges based on real-world scenarios so your team can build practical skills  | - Facilitated by an expert AWS instructor who can answer questions and give real time feedback | - Reinforce your team's learning while it's still fresh in your team's heads – AWS Jam can be added after the final day of classroom training class |
