

IBM Spectrum Scale Basic Administration for Linux

Duration: 3 Days Course Code: H005G

Overview:

This course is intended for IT professionals tasked with administering a GPFS system. This course includes information on installing, configuring and monitoring a GPFS cluster. Many features are described and tested in hands on lab activities including: Storage management, HA options, cluster management and information lifecycle management (ILM) tools.

Target Audience:

Please refer to Course Overview for description information.

Objectives:

- | | |
|------------------------------|--|
| ■ Install and Configure GPFS | ■ Implement a highly available GPFS cluster |
| ■ | ■ |
| ■ Use Administration Tools | ■ Describe the ILM tools available and how to use them |
| ■ | |

Prerequisites:

You are expected to have a good understanding of UNIX/Linux, SAN and Storage concepts.

Content:

- Installation and Configuration
- GPFS Cluster
- Information Life Cycle Tools
- High Availability
- Management and Monitoring
- Multi-cluster
