

HCIA-Routing and Switching

Duration: 5 Days **Course Code: HCIA-RS**

Overview:

This course is an introduction to Huawei Certified ICT Associate-Level Routing and Exchange Course. This course introduces basic concepts and basic network knowledge of routing and switching.

Target Audience:

Personnel who want to become data communication engineers
Personnel who want to obtain HCIA-R&S certification

Objectives:

- On completion of this program, the participants will be able to:
 - Describe the basic principles of data communication and be competent for basic O&M of IP networks.
 - Plan and design IP addresses.
 - Performing Basic VRP Operations.
 - Describe the functions and working principles of the switching equipment.
 - Set up an efficient switching network by configuring switching devices and running the STP/RSTP protocol.
 - Describe the basic principles of routing and routing protocols. Configure OSPF to build an efficient routing network.
 - Configure common services on enterprise networks, such as DHCP, FTP, and Telnet, so that engineer can efficiently use and manage the network.
 - Configure link aggregation, VLAN to enhance the performance of Layer two networks.
 - Configure HDLC, PPP, PPPoE to implement WAN interconnection.
 - Performing NAT Configuration.
 - Configure ACL, AAA, and IPSec/GRE to provide security solutions for IP networks.
 - Configure SNMP to manage networks in a unified manner.
 - Know about principle of MPLS and Segment Routing.
-

Prerequisites:

- Be familiar with PC operations
 - Have a basic understanding of IT technologies and network knowledge
-
