

Transforming to a Cisco Intent Based Network

Duration: 5 Days **Course Code: IBNTRN** **Version: 2.0** **Delivery Method: Virtual Classroom**

Overview:

Gain hands-on experience deploying, operating, and managing Cisco SD-Access networks using Cisco Catalyst Center, including wired, wireless, extended enterprise, and multi-site deployments. Acquire skills to migrate from traditional networks to SD-Access networks and troubleshoot wired, wireless, and segmentation issues effectively.

The Transforming to a Cisco Intent-Based Network (IBNTRN) training teaches you the functionality of Cisco® SD-Access. Through a combination of lessons and hands-on learning, you will practice deploying, operating, and managing SD-Access networks using Cisco Catalyst Center. You will learn how Cisco delivers intent-based networking across the campus, branch, WAN, and extended enterprise and ensures that your network is operating as intended.

You will explore Cisco Catalyst Center automation and assurance features, build wired and wireless fabric networks, implement segmentation and guest access, deploy multi-site and multicast services, migrate existing networks to SD-Access, and use Cisco Catalyst Center to troubleshoot common SD-Access issues.

This training also earns you 40 Continuing Education (CE) credits toward recertification.

Updated 09/07/2026

Virtual Learning

This interactive training can be taken from any location, your office or home and is delivered by a trainer. This training does not have any delegates in the class with the instructor, since all delegates are virtually connected. Virtual delegates do not travel to this course, Global Knowledge will send you all the information needed before the start of the course and you can test the logins.

Target Audience:

This class is intended for the following participants:

- Network Administrators
- Network Engineers
- System Engineers
- Technical Architects
- Technical Support Personnel
- Sales Engineers

Objectives:

- | | |
|---|---|
| ■ In this course participants will learn: | ■ Deploy and manage extended enterprise using Cisco SD-Access |
| ■ Describe Cisco Catalyst Center | ■ Implement micro and macro segmentation in Cisco SD-Access wired and wireless networks |
| ■ Implement Cisco Catalyst Center automation features, such as network device discovery mechanisms, device inventory, and basic network settings automation | ■ Deploy and manage guest wireless access using Cisco SD-Access and Cisco ISE |
| ■ Use Cisco Catalyst Center Assurance features, such as network, client, and application health, network issues, and AI Analytics | ■ Describe different options to migrate from traditional network to SD-Access network |
| ■ Describe Cisco SD-Access fabric networks | ■ Deploy and manage multi-site Cisco SD-Access network |
| ■ Deploy and manage wired Cisco SD-Access fabric networks | ■ Deploy and manage multicast in Cisco SD-Access network |
| ■ Deploy and manage wireless Cisco SD-Access networks | |

Prerequisites:

The knowledge and skills you are recommended to have before attending this training are:

Testing and Certification

- None

- Understanding of network routing and switching principles equivalent to a CCNP® Enterprise level
- Experience with Cisco wireless technologies
- Experience with Cisco ISE, 802.1x, and Cisco TrustSec
- Understanding of segmentation technologies such as VLANs and Virtual Routing and Forwarding (VRF)
- Basic understanding of overlay technologies such as Virtual Extensible LAN (VXLAN)
- Basic understanding of Locator ID Separation Protocol (LISP)
- 8021X - Introduction to 802.1X Operations for Cisco Security Professionals
- WLFNDU - Understanding Cisco Wireless Foundations
- ENCOR - Implementing and Operating Cisco Enterprise Network Core Technologies

Follow-on-Courses:

- *None Recommended*

Content:

COURSE OUTLINES

- Introduction to Cisco Catalyst Center
- Cisco Catalyst Center SD-Access Automation
- Cisco Catalyst Center SD-Access Assurance
- Cisco SD-Access Overview
- Wired Cisco SD-Access
- Wireless Cisco SD-Access
- Cisco SD-Access Extended Enterprise
- Cisco SD-Access Segmentation
- Cisco Catalyst Center and Cisco ISE Integration
- Cisco SD-Access Segmentation Packet Flows
- Cisco SD-Access Guest Access
- Cisco SD-Access Migration
- Cisco SD-Access Multisite
- Cisco SD-Access Multicast

LAB OUTLINES

- Discover and Provision Network Devices
- Perform LAN Automation
- Configure Wired Network Fabric Site
- Configure and Verify Host Onboarding
- Configure Wireless Network Fabric
- Configure and Verify Access Point and Host Onboarding
- Configure Cisco SD-Access Extended Enterprise
- Implement Microsegmentation
- Configure Wireless Guest Access
- Migrate Existing Site to Fabric Using Layer 2 Border
- Configure Multisite Fabric
- Configure Multicast
