

Microsoft Azure Administrator

Duration: 4 Days **Course Code: M-AZ104** **Delivery Method: Virtual Classroom**

Overview:

Exclusive - The Azure Administrator implements, manages, and monitors identity, governance, storage, compute, and virtual networks in a cloud environment.

This course teaches IT Professionals how to manage their Azure subscriptions, secure identities, administer the infrastructure, configure virtual networking, connect Azure and on-premises sites, manage network traffic, implement storage solutions, create and scale virtual machines, implement web apps and containers, back up and share data, and monitor your solution.

Virtual Learning

This interactive training can be taken from any location, your office or home and is delivered by a trainer. This training does not have any delegates in the class with the instructor, since all delegates are virtually connected. Virtual delegates do not travel to this course, Global Knowledge will send you all the information needed before the start of the course and you can test the logins.

Target Audience:

This course is for Azure Administrators. The Azure Administrator implements, manages, and monitors identity, governance, storage, compute, and virtual networks in a cloud environment. The Azure Administrator will provision, size, monitor, and adjust resources as appropriate.

Objectives:

- Students will learn:
- AZ-104: Prerequisites for Azure administrators
- AZ-104: Manage identities and governance in Azure
- AZ-104: Implement and manage storage in Azure
- AZ-104: Configure and manage virtual networks for Azure administrators
- AZ-104: Deploy and manage Azure compute resources
- AZ-104: Monitor and back up Azure resources

Prerequisites:

Successful Azure Administrators start this role with experience in virtualization, networking, Identity, and storage.

- Understanding of on-premises virtualization technologies, including: VMs, virtual networking, and virtual hard disks.
- Understanding of network configurations, including TCP/IP, Domain Name System (DNS), virtual private networks (VPNs), firewalls, and encryption technologies.
- Understanding of Active Directory concepts, including users, groups, and role-based access control.
- Understanding of resilience and disaster recovery, including backup and restore operations.

Testing and Certification

Microsoft Certified: Azure Administrator Associate

Content:

AZ-104: Prerequisites for Azure administrators

- Use Azure Resource Manager
- Introduction to Azure Cloud Shell
- Introduction to Bash
- Introduction to PowerShell
- Configure resources with Azure Resource Manager templates

AZ-104: Manage identities and governance in Azure

- Understand Microsoft Entra ID
- Configure user and group accounts
- Configure subscriptions
- Configure Azure Policy
- Configure role-based access control
- Create Azure users and groups in Microsoft Entra ID
- Secure your Azure resources with Azure role-based access control (Azure RBAC)
- Allow users to reset their password with Microsoft Entra self-service password reset

AZ-104: Implement and manage storage in Azure

- Configure storage accounts
- Configure Azure Blob Storage
- Configure Azure Storage security
- Configure Azure Files and Azure File Sync
- Create an Azure Storage account
- Control access to Azure Storage with shared access signatures
- Upload, download, and manage data with Azure Storage Explorer

AZ-104: Configure and manage virtual networks for Azure administrators

- Configure virtual networks
- Configure network security groups
- Configure Azure Virtual Network peering
- Configure network routing and endpoints
- Configure Azure Load Balancer
- Configure Azure Application Gateway
- Design an IP addressing schema for your Azure deployment
- Distribute your services across Azure virtual networks and integrate them by using virtual network peering
- Host your domain on Azure DNS
- Manage and control traffic flow in your Azure deployment with routes
- Improve application scalability and resiliency by using Azure Load Balancer

AZ-104: Deploy and manage Azure compute resources

- Configure virtual machines
- Configure virtual machine availability
- Configure Azure App Service plans
- Configure Azure App Service
- Configure Azure Container Instances
- Manage virtual machines with the Azure CLI
- Create a Windows virtual machine in Azure
- Host a web application with Azure App Service

AZ-104: Monitor and back up Azure resources

- Configure virtual machine backups
- Configure Azure Monitor
- Configure Log Analytics
- Configure Network Watcher
- Improve incident response with Azure Monitor alerts
- Analyze your Azure infrastructure by using Azure Monitor logs
- Monitor your Azure virtual machines with Azure Monitor
