

Palo Alto Networks: Firewall: Troubleshooting (EDU-330)

Duration: 3 Days Course Code: PAN-EDU-330 Version: 11.1.A

Overview:

The Palo Alto Networks Firewall: Troubleshooting course is three days of instructor-led training that will help you to:

- Use firewall tools, including the CLI, to investigate networking issues
- Follow proven troubleshooting methodologies that are specific to individual features
- Analyze advanced logs to resolve various real-life scenarios
- Solve advanced, scenario-based challenges

Target Audience:

Security Engineers and Administrators Security Operations Specialists and Analysts Network Engineers Support Staff

Objectives:

- Successful completion of this three-day, instructor-led course will enhance the participants understanding of troubleshooting the full line of Palo Alto Networks next-generation firewalls.
- Completing this class will help participants develop an in-depth knowledge of how to troubleshoot visibility and control over applications, users, and content.
- Participants will perform hands-on troubleshooting related to the configuration and operation of the Palo Alto Networks firewall.

Prerequisites:

- Participants must complete the Firewall Essentials: Configuration and Management (EDU-210) course.
- Participants must have strong practical knowledge of routing and switching, IP addressing, network security concepts, and at least six months of on-the-job experience with Palo Alto Networks firewalls.
- PAN-EDU-210 - Palo Alto Networks: Firewall Essentials: Configuration and Management (EDU-210)
