Palo Alto Networks: Panorama Centralized Network Security Administration (PCNS-ADMIN)

Duration: 2 Days **Course Code: PAN-PCNS-ADMIN** **Delivery Method: Closed Events**

Overview:

The Palo Alto Networks Panorama: Centralized Network Security Administration course is two days of instructor-led training that should help you to:
- Learn how to configure and manage the next-generation Panorama management server
- Gain experience configuring templates (including template variables) and device groups
- Activate, configure, and manage Prisma Access using Panorama

Company Events

These events can be delivered exclusively for your company at our locations or yours, specifically for your delegates and your needs. The Company Events can be tailored or standard course deliveries.

Target Audience:

- Security Administrators
- Security Operations Specialists
- Security Analysts

Objectives:

- This course should help students gain experience configuring and managing Palo Alto Networks Panorama management servers. Administrators that complete this course should become familiar with the Panorama management server's role in managing and securing the overall network.

Prerequisites:

Participants should complete the Firewall: Configuration and Management class (EDU-210).

Participants must be familiar with Palo Alto Networks next-generation firewall management and basic networking concepts, including routing and IP addressing.

Testing and Certification

Palo Alto Networks Certified Next-Generation Firewall Engineer

Content:

- Initial Configuration
- Adding Firewalls
- Templates
- Device Groups
- Prisma Access Overview
- Activate and Configure
- Templates and Device Groups
- Configure Service Connections
- Secure Remote Networks
