

QRadar SOAR: Foundations

Duration: 2 Days **Course Code: BQ405G** **Delivery Method: Virtual Classroom**

Overview:

In this course, you learn about the IBM Security® QRadar® SOAR architecture, and how to position the product in your company's security architecture design. You gain hands-on experience with the SOAR interface, by investigating and managing cases and users with the SOAR Breach Response module, playbooks, and email integration.

Virtual Learning

This interactive training can be taken from any location, your office or home and is delivered by a trainer. This training does not have any delegates in the class with the instructor, since all delegates are virtually connected. Virtual delegates do not travel to this course, Global Knowledge will send you all the information needed before the start of the course and you can test the logins.

Target Audience:

Security operations center (SOC) Administrator SOC Analyst Security Analyst Incident Responder Managed Service Security Provider (MSSP)
