Programmation & Statistical analysis with R

Duration: 2 Days   Course Code: U6PAR1G

Overview:

This course provides an introduction to programming and statistical analysis with R.

Target Audience:

Anyone who wants to learn and use the programmation language R to analyse datas and produce statistical graphs

Objectives:

- To learn and use the programmation language R to analyse datas and produce statistical graphs.

Prerequisites:

None

Content:

During this course you will learn:

- The basic concepts of programming in R and the use of packages R
- To explore the data available
- To produce descriptive graphs
- To achieve the patterns of the linear regression and ANOVA
