Planning and Administering a High Available SAP Landscape on MS Azure

Duration: 5 Days **Course Code: AD611** **Delivery Method: Company Event**

Overview:

This course provides an introduction to Azure for SAP workloads and will cover planning, migration and maintanance of the SAP workloads.

Company Events

These events can be delivered exclusively for your company at our locations or yours, specifically for your delegates and your needs. The Company Events can be tailored or standard course deliveries.

Target Audience:

Application Consultant Business Process Architect Enterprise Architect Solution Architect System Architect Technology Consultant

Objectives:

- This course will prepare you to:
- This seminar focuses on the architecture, sizing and configuration of Azure components that meet the specific requirements of a highly available high-performance SAP S/4 HANA landscape for test, quality assurance and productive systems. Learned best practices are implemented on SAP systems in the Azure Cloud.
- Solutions architects and consultants are not only instructed in the design of a high-availability SAP Landscape but are also considered from a cost optimization perspective. Using concrete examples, various scenarios and reference architectures for a high-performance "SAP on Azure" cloud infrastructure will be presented.
- The subsequent project steps necessary for the implementation or migration of an SAP Landscape, from the network via storage and server, for the SAP-specific application and database instances, are planned and set up as templates or blueprints in the Azure Cloud.
- Attending this seminar enables you to participate in the Microsoft certification AZ-120 "Planning and Administering Microsoft Azure for SAP Workloads".

Prerequisites:

SAP Basis knowledge of SAP applications, SAP HANA, S/4HANA, SAP NetWeaver and SAP BW. Knowledge of the Microsoft Azure concepts, components and administration procedures within the Microsoft Azure Cloud

Content:

- Introduction to Azure for SAP Workloads
- (Optional) Foundations of Azure for SAP Workloads
- SAP Certified Offerings on Azure
- Azure for SAP Workloads Reference Architecture
- Planning for Implementing SAP Solutions on Azure
- Planning for Migrating SAP Workloads to Azure
- Implementing Azure VM-based SAP Solutions
- (Optional) Deploying HANA Large Instances (HLI)
- Migrating SAP Workloads to Azure
- Maintaining Azure for SAP Workloads
- Monitoring and Troubleshooting Azure for SAP Workloads • Lab: SAP HA Installation in Microsoft Azure
