

Introduction to SAP Business Technology Platform (BTP) Administration

Duration: 3 Days **Course Code: ADMCLD** **Delivery Method: Virtual Learning**

Overview:

This course provides participants with an overview of administrative tasks in the SAP Business Technology Platform (BTP). It covers the concepts of RISE with SAP and intelligent enterprise followed by the architecture of the SAP BTP. The architecture of global accounts, subaccounts, services, runtime environments is shown like Cloud Foundry, Kyma (Kubernetes), and ABAP. The tools SAP BTP Cockpit, SAP Discovery Center, and the command line interface (CLI) are used in exercises. Participants will learn how to define destinations, connect Cloud Connectors, create and assign role collections with pre-defined roles, understand SAP HANA Cloud and third-party databases. The application lifecycle management (ALM) compares the features of SAP Solution Manager, SAP Focused Run, and SAP Cloud ALM including monitoring in SAP BTP Cockpit. In addition, the SAP Cloud Transport Management Service (cTMS) is introduced.

Virtual Learning

This interactive training can be taken from any location, your office or home and is delivered by a trainer. This training does not have any delegates in the class with the instructor, since all delegates are virtually connected. Virtual delegates do not travel to this course, Global Knowledge will send you all the information needed before the start of the course and you can test the logins.

Target Audience:

Database Administrator Enterprise Architect System Administrator System Architect Technology Consultant

Objectives:

- This course will prepare you to:
 - Administrate accounts, services, and users in SAP BTP
 - Understand the concepts of SAP BTP
 - Manage connections, databases, and monitoring in SAP BTP
 - Understand the tasks of an SAP BTP administrator
-

Prerequisites:

■

Content:

SAP Strategy

- RISE with SAP and Intelligent Enterprise
- Extension and Integration Suite

Architectures

- Account Model and Services
- ABAP, Cloud Foundry, and Kyma Runtime Environments
- Cloud Development Concept

Configuration

- Discovery Center and Boosters
- Command Line Interface

Connectivity

- Destinations
- Cloud Connector

User Management

- Account User Management
- SAP Cloud Identity Services

Database Offerings

- SAP HANA Cloud

Application Lifecycle Management

- Product Portfolio

Monitoring

- SAP Application Logging Service
- SAP Cloud ALM Interface Channel

Transport Management
