

## ONTAP Cluster Administration and Data Protection Class

**Duration: 5 Days**    **Course Code: NEP\_OT-CLU-DPA**

### Overview:

This 5 day class is a combination of the 3 day Cluster Administration Class and the 2 day Data Protection Class.

#### Cluster Administration

In this course, you learn the basic administration tasks of a NetApp® ONTAP® 9.16 cluster. Use the clustershell and NetApp ONTAP System Manager to manage cluster storage and network resources. Discover how to configure basic data protection and data efficiency functions and common cluster maintenance tasks.

#### Data Protection

Explore key concepts and techniques for protecting data on NetApp® ONTAP® based storage systems. Learn about the data protection solutions that are integrated in ONTAP software and examine the tools to manage ONTAP data protection features. In the hands-on exercises, use NetApp ONTAP System Manager and the ONTAP CLI to perform key data protection tasks.

This course is updated for ONTAP 9.16.1 software.
