
RPG IV Programming Advanced Workshop for i

Duration: 4 Days **Course Code: AS10G** **Delivery Method: Company Event**

Overview:

A comprehensive exposure to some of the advanced features and functions of the language for experienced RPG IV programmers. Power-programming for the discerning!

Company Events

These events can be delivered exclusively for your company at our locations or yours, specifically for your delegates and your needs. The Company Events can be tailored or standard course deliveries.

Target Audience:

This is the third in a series of three courses designed for programmers who are new to RPG IV. Basic programming experience using RPG IV is essential. Experienced RPG/400 programmers who have recently migrated to the RPG IV language will also find this course important to their continued skills development.

Objectives:

- After completing this course, the student should be able to:
 - Use address pointers and user spaces in RPG IV programs
 - Write database triggers in RPG IV
 - Develop ILE modular objects and package them in service programs
 - Explain the purpose of ILE Activation Groups
 - Explain the behavior of Error Handling and Percolation in ILE
 - Code an ILE Error Handling program
 - Call iSeries APIs from RPG IV programs
 - Describe how to use CGI in RPG IV for web applications
-

Prerequisites:

Before attending this course, the student should be able to:

- Code subfile-processing programs in RPG IV
 - Employ error-handling features of the RPG IV language.
 - Describe the basic concepts of ILE and modular program design.
 - Use free-format coding techniques
 - Write date-processing routines which employ built-in functions
 - AS06 - iSeries RPG IV Programming - Fundamentals
-
