

BCS Data Management Essentials Course with Written Exam

Duration: 4 Days **Course Code: SDME** **Delivery Method: Virtual Learning**

Overview:

Gain a sound understanding of essential aspects of data and database administration, and learn best practice data management skills and techniques. The **Data Management Essentials** course is also a Specialist Practitioner module for the [BCS International Diploma in Business Analysis](#).

Virtual Learning

This interactive training can be taken from any location, your office or home and is delivered by a trainer. This training does not have any delegates in the class with the instructor, since all delegates are virtually connected. Virtual delegates do not travel to this course, Global Knowledge will send you all the information needed before the start of the course and you can test the logins.

Target Audience:

Business analysts, solution developers, project managers and anyone who is involved in managing corporate data or is responsible for database administration. Data Management Essentials is also a Specialist Practitioner module on the BCS International Diploma in Business Analysis.

Objectives:

- Are you a data management practitioner, IT/IS manager or business manager concerned with how data is used and managed in your organisation? Would you like to learn the skills and techniques to allow you to implement an industry standard, best practice approach to data management? If the answer to those questions is 'yes', then this course on Data Management Essentials is perfect for you.
 - The **Data Management Essentials** course demonstrates various techniques and procedures for managing corporate data and describes which roles combine to provide an effective data management team. The course also covers data and enterprise, data quality and current data management themes. You will learn through short, focused sessions where your trainer will encourage you to share problems and issues you may have faced.
 - Presented to you by one of the expert training consultants pictured below. Each member of our data management training team brings substantial experience of data management to the programme.
-

Testing and Certification

During this four day course you'll receive all the training you need to prepare for the BCS Data Management Essentials certificate exam. A pass in this module will contribute to the BCS International Diploma in Business Analysis.

For delegates attending a virtual or online course, the exam will be a written, scenario-based, open book exam and may be taken at one of our classroom locations in London or Thame. The pass mark is 25/50. Please contact us for further details, available dates and to make a booking.
