

BCS Business Architecture Course with Online Exam

Duration: 3 Days **Course Code: SIBA**

Overview:

Explore the fundamental concepts and techniques of business architecture and learn how to establish a multi-faceted blueprint of an organisation. Designed for business analysts, business architects, project managers and other change specialists, the course contributes towards the [BCS Advanced International Diploma in Business Analysis](#).

Target Audience:

Business analysts, project managers, business managers, and business change specialists – and anyone who requires a thorough understanding of business architecture frameworks. Business Architecture is also a Analytical Skills module on the BCS (ISEB) Advanced Diploma in Business Analysis.

Objectives:

- Aimed at business analysts, project and business managers, and business change specialists, this Business Architecture course enables delegates to gain a greater understanding of the key concepts and techniques involved.
 - Presented to you by one of the expert training consultants pictured below, each of whom brings substantial experience of business architecture and business analysis projects to the programme.
 - The course focuses on the business rather than the technology side of the subject, covering a range of techniques and frameworks as well as the relationship with other architectures and disciplines. Other topics you'll explore include value chain analysis, understanding business culture and information management.
-

Testing and Certification

During this three day course you'll receive all the training you need to prepare for the BCS Business Architecture Professional Certificate exam. A pass in this module will contribute to the BCS International Advanced Diploma in Business Analysis Diploma.

For delegates attending a classroom, virtual classroom or online course, the exam may be taken remotely using the BCS online proctoring service. This exam consists of 40 multiple-choice questions with a pass mark of 26/40.
