
Effective RACF Administration

Duration: 5 Days Course Code: BE87G

Overview:

Practical online course shows how to plan and implement RACF to secure and protect the resources of an OS/390 system includes CICS, IMS and DFSMS environments.

Target Audience:

Personnel with responsibility for implementing and maintaining a RACF security system.

Objectives:

- On completion, you will be able to:
 - Identify the security requirements of a system
 - Use RACF to protect resources
 - Define users and resources to the system
 - Set up a RACF group structure
 - Use the RACF Report Writer
 - Select options to tailor RACF
 - Administer the system to meet the installation's security goals
 - Develop a suitable implementation plan.
-

Prerequisites:

Introduction to OS/390 System Services (ES05GB) or equivalent and some practical experience of working in an OS/390 environment.

Content:

- | | | |
|--|--|---------------------------------|
