Effective RACF Administration

Duration: 4 Days   Course Code: BE87G   Delivery Method: Virtual Learning

Overview:

Practical online course shows how to plan and implement RACF to secure and protect the resources of an OS/390 system includes CICS, IMS and DFSMS environments.

Virtual Learning

This interactive training can be taken from any location, your office or home and is delivered by a trainer. This training does not have any delegates in the class with the instructor, since all delegates are virtually connected. Virtual delegates do not travel to this course, Global Knowledge will send you all the information needed before the start of the course and you can test the logins.

Target Audience:

Personnel with responsibility for implementing and maintaining a RACF security system.

Objectives:

- On completion, you will be able to:
- Identify the security requirements of a system
- Use RACF to protect resources
- Define users and resources to the system
- Set up a RACF group structure

- Use the RACF Report Writer
- Select options to tailor RACF
- Administer the system to meet the installation's security goals
- Develop a suitable implementation plan.

Prerequisites:

Introduction to OS/390 System Services (ES05GB) or equivalent and some practical experience of working in an OS/390 environment.

Content:

- Protection of OS/390 system facilities
- Implementation strategy
- Defining groups and users

- Protecting data sets, tape volumes and general resources
- Controlling CICS, IMS and DFSMS environments
- Exits and utilities

- DSMON monitor program
- RACF report writer
- Protection of JES facilities.
