

SAP BW/4HANA Data Acquisition

Duration: 5 Days **Course Code: BW450** **Delivery Method: Virtual Learning**

Overview:

This course enables SAP BW/4HANA customers and consultants to provision (load, replicate) data into SAP BW/4HANA. It highlights the simplified data flow of BW/4HANA, and data provision techniques targeting the underlying SAP HANA database directly. The emphasis is on learning and practicing various technologies in support of data acquisition including Operational Data Provisioning, Smart Data Integration and CDS views. Special topics are changing a hierarchy via upload, enhanced master data upload, creating a Process Chain from a BW DataFlow, and error handling. In addition, a brief excursion to SAP Data Hub is also covered.

Virtual Learning

This interactive training can be taken from any location, your office or home and is delivered by a trainer. This training does not have any delegates in the class with the instructor, since all delegates are virtually connected. Virtual delegates do not travel to this course, Global Knowledge will send you all the information needed before the start of the course and you can test the logins.

Target Audience:

DeveloperSolution ArchitectSystem AdministratorTechnology ConsultantTrainer

Objectives:

- This course will prepare you to:
- Learn about advanced features of Streaming Process Chains
- Learn how to extract data from SAP source systems and another BW with Operational Data Provisioning (ODP) and how to manage delta data with ODP
- Integrate data from SAP HANA via BW Source Systems to BW/4HANA
- Acquire data using different interfaces such as: SDI - Smart Data Integration, SDA - Smart Data Access, Flat File and CDS views
- Being able to position related provisioning technologies under the SAP Data Hub umbrella, including SAP Vora
- Design and maintain Data Flows with advanced techniques

Prerequisites:

- BW410 - SAP BW/4HANA Data Warehousing
