

## iSQI Certified Agile Business Analysis (CABA) + exam

Duration: 2 Days Course Code: CABA

### Overview:

This two-day iSQI training course is primarily aimed at providing insight into the day-to-day activities of the business analyst (BA) in an Agile development environment. The training gives an overview of the essential differences with the traditional BA role. Within Agile, business analysis can be seen as a role that is no longer reserved for a business analyst, but which can be filled by several team members. However, some expertise is required. Certified Agile Business Analysis (CABA) introduces a number of techniques that are well applicable in business analysis in an Agile approach and philosophy. The training can very well be complemented by an Agile Foundation or Practitioner in Agile Quality (PAQ) training, which in addition to the theoretical element, also includes practical simulated Agile iterations.

### Target Audience:

Business analysts needing a clear understanding of Agile and its applications  
Business analysts wanting to improve the way they work in agile projects  
Anyone interested in business analysis who wishes to build agile capabilities  
Business Analysts wanting to certify their agile skills for recognition by employers, clients and peers

### Objectives:

- With the iSQI® Certified Agile Business Analysis (CABA) certification:
- You will have an internationally recognised certification
- Articulate the business analyst's responsibilities to both the enterprise and the agile team
- Understand the business analyst's contribution to the agile process analysis frameworks
- Identify business analysis specific techniques that contribute to the delivery of artefacts that add value to the enterprise initiating agile projects
- Appreciate the importance of, and how to contribute to, continuous improvement through retrospectives
