

Implementing with SAP Cloud ALM

Duration: 2 Days **Course Code: CALM20** **Delivery Method: Virtual Learning**

Overview:

SAP Cloud ALM is the Application Lifecycle Management offering for the implementation and operation of cloud-based and hybrid SAP system landscapes. Users benefit from a native cloud solution that was developed as a central entry point for the management and automated operation of SAP landscapes as well as for the implementation of SAP solutions. In this course, participants will gain a detailed and at the same time practical insight into the use of SAP Cloud ALM for Implementation. The focus here is on the possibilities for an accelerated introduction of SAP solutions. In the training, the methodology and functionalities of SAP Cloud ALM are presented, and their application is trained in numerous practical exercises. As a result of the training, participants will be able to apply SAP Cloud ALM for Implementations and will also be able to convey the benefits of the integrated methodology.

Virtual Learning

This interactive training can be taken from any location, your office or home and is delivered by a trainer. This training does not have any delegates in the class with the instructor, since all delegates are virtually connected. Virtual delegates do not travel to this course, Global Knowledge will send you all the information needed before the start of the course and you can test the logins.

Target Audience:

- Project Lead
 - Projekt Management Office
 - Test Manager
 - Solution Architect
 - Process Owner
 - Application Consultant
 - Developer
 - Release Manager
-

Objectives:

- | | |
|---|---|
| ■ This course will prepare you to: | ■ Understand the connections to the SAPs implementation methodology SAP Activate. |
| ■ Explain the core elements of SAP Cloud ALM. | ■ Plan the transition from SAP Solution Manager to SAP Cloud ALM. |
| ■ Use SAP Cloud ALM in agile implementation projects. | |
-

Prerequisites:

Essential

none

Recommended

none

Content:

- | | | |
